Tesla's Texas vehicle and Megapack rows read Production. The robot row reads Construction.

The lit doors are Model Y, Cybertruck, Cybercab and Megapack under Tesla’s Texas label. The dark door is Optimus, its humanoid robot. Drawn to illustrate.

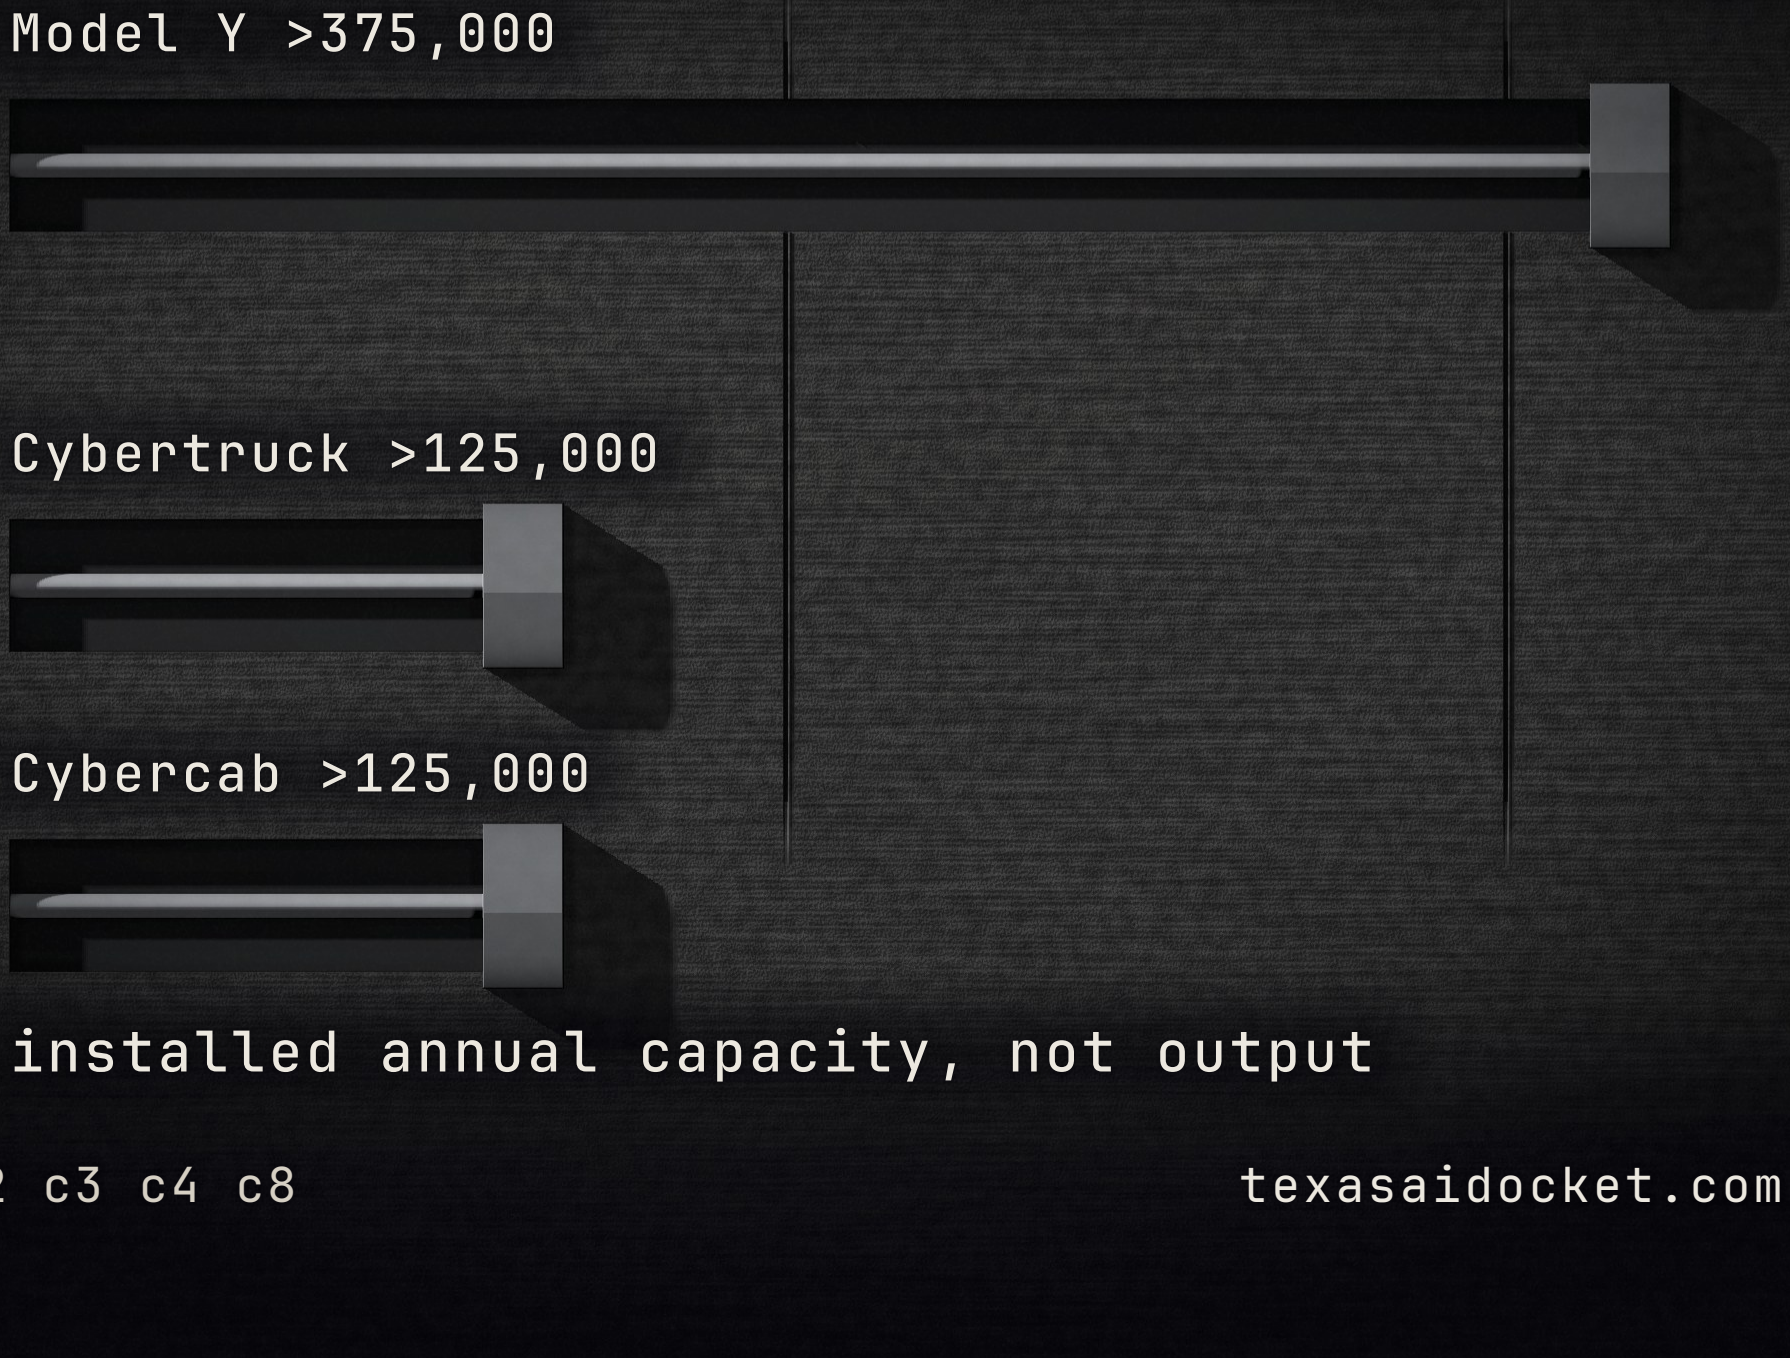

More than 375,000 Model Y a year, installed

Tesla lists Model Y in Texas at more than 375,000 a year of installed capacity, status Production. It also says installed capacity is not the current production rate. The bay is drawn to illustrate.

Three vehicle rows on one scale

Each channel’s length is the floor Tesla prints for its row. The Model Y floor is three times the Cybertruck and Cybercab floors, each printed as more than.

Tesla says Megafactory Texas began production

The table lists Megapack in Texas at 50 GWh, status Production. The update’s highlights call the same 50 GWh planned capacity. Each enclosure drawn here stands for a fifth of it.

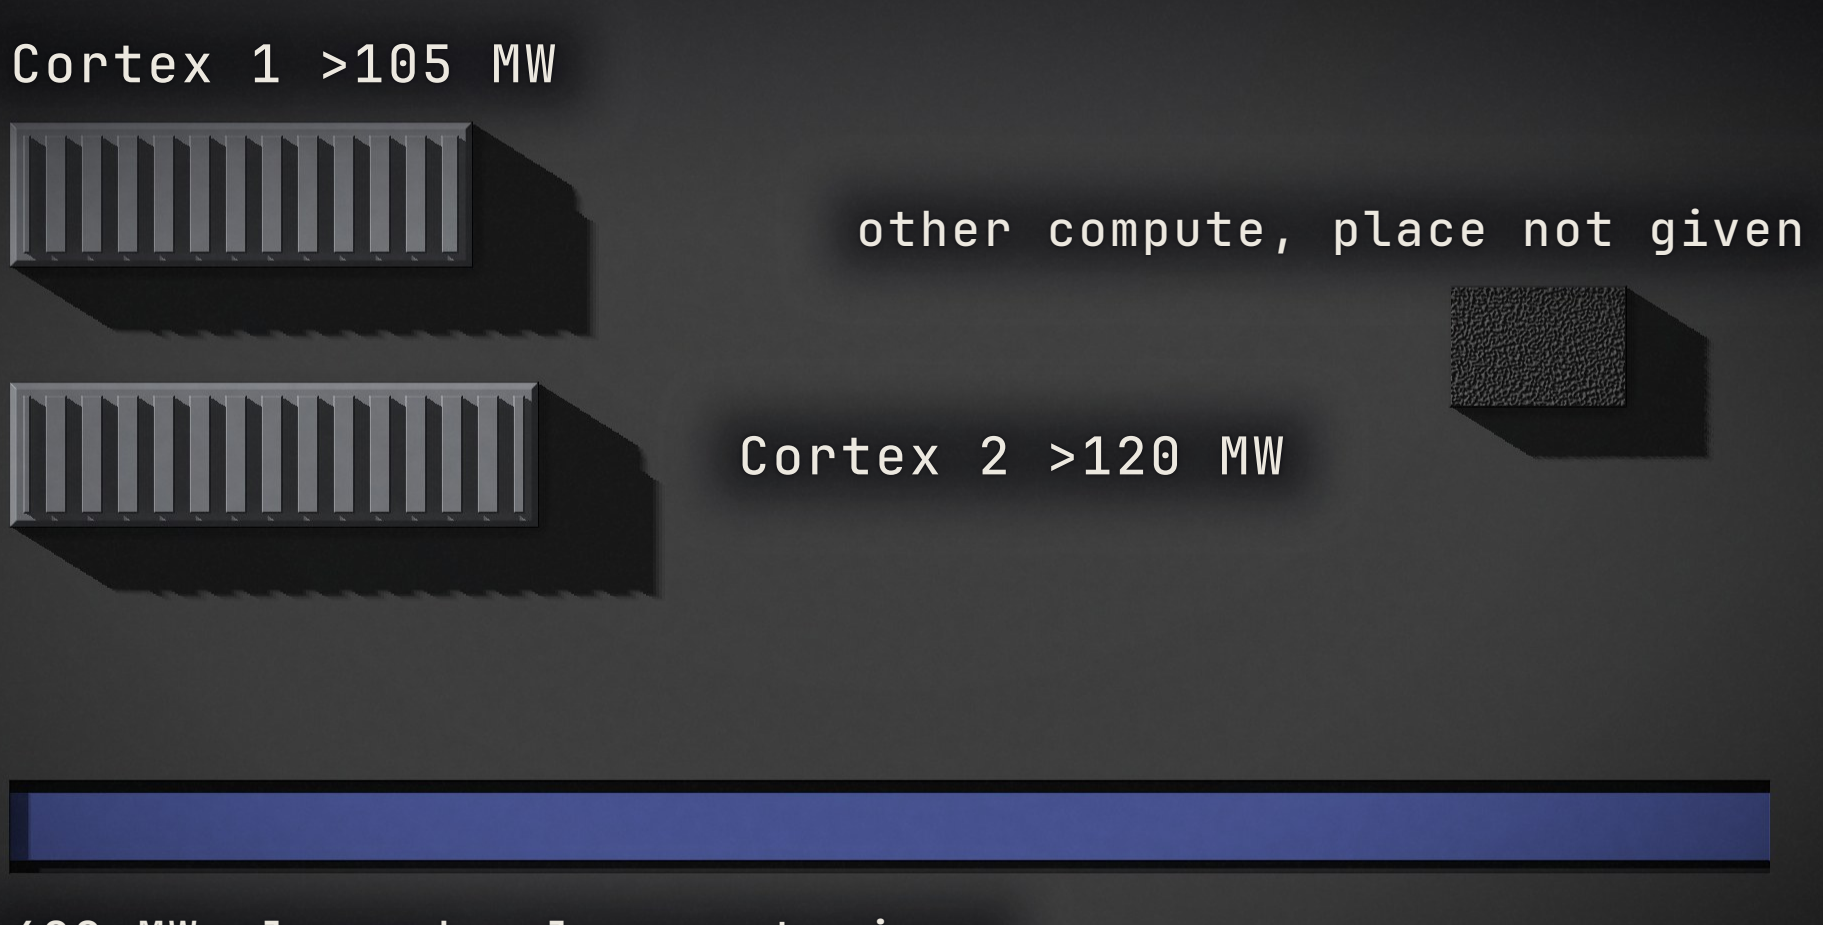

Construction, with no figure

Tesla’s Texas row for Optimus gives no capacity figure. Tesla defines construction as buildout and tool installation. Robot production began in Fremont, California. The bay is drawn to illustrate.

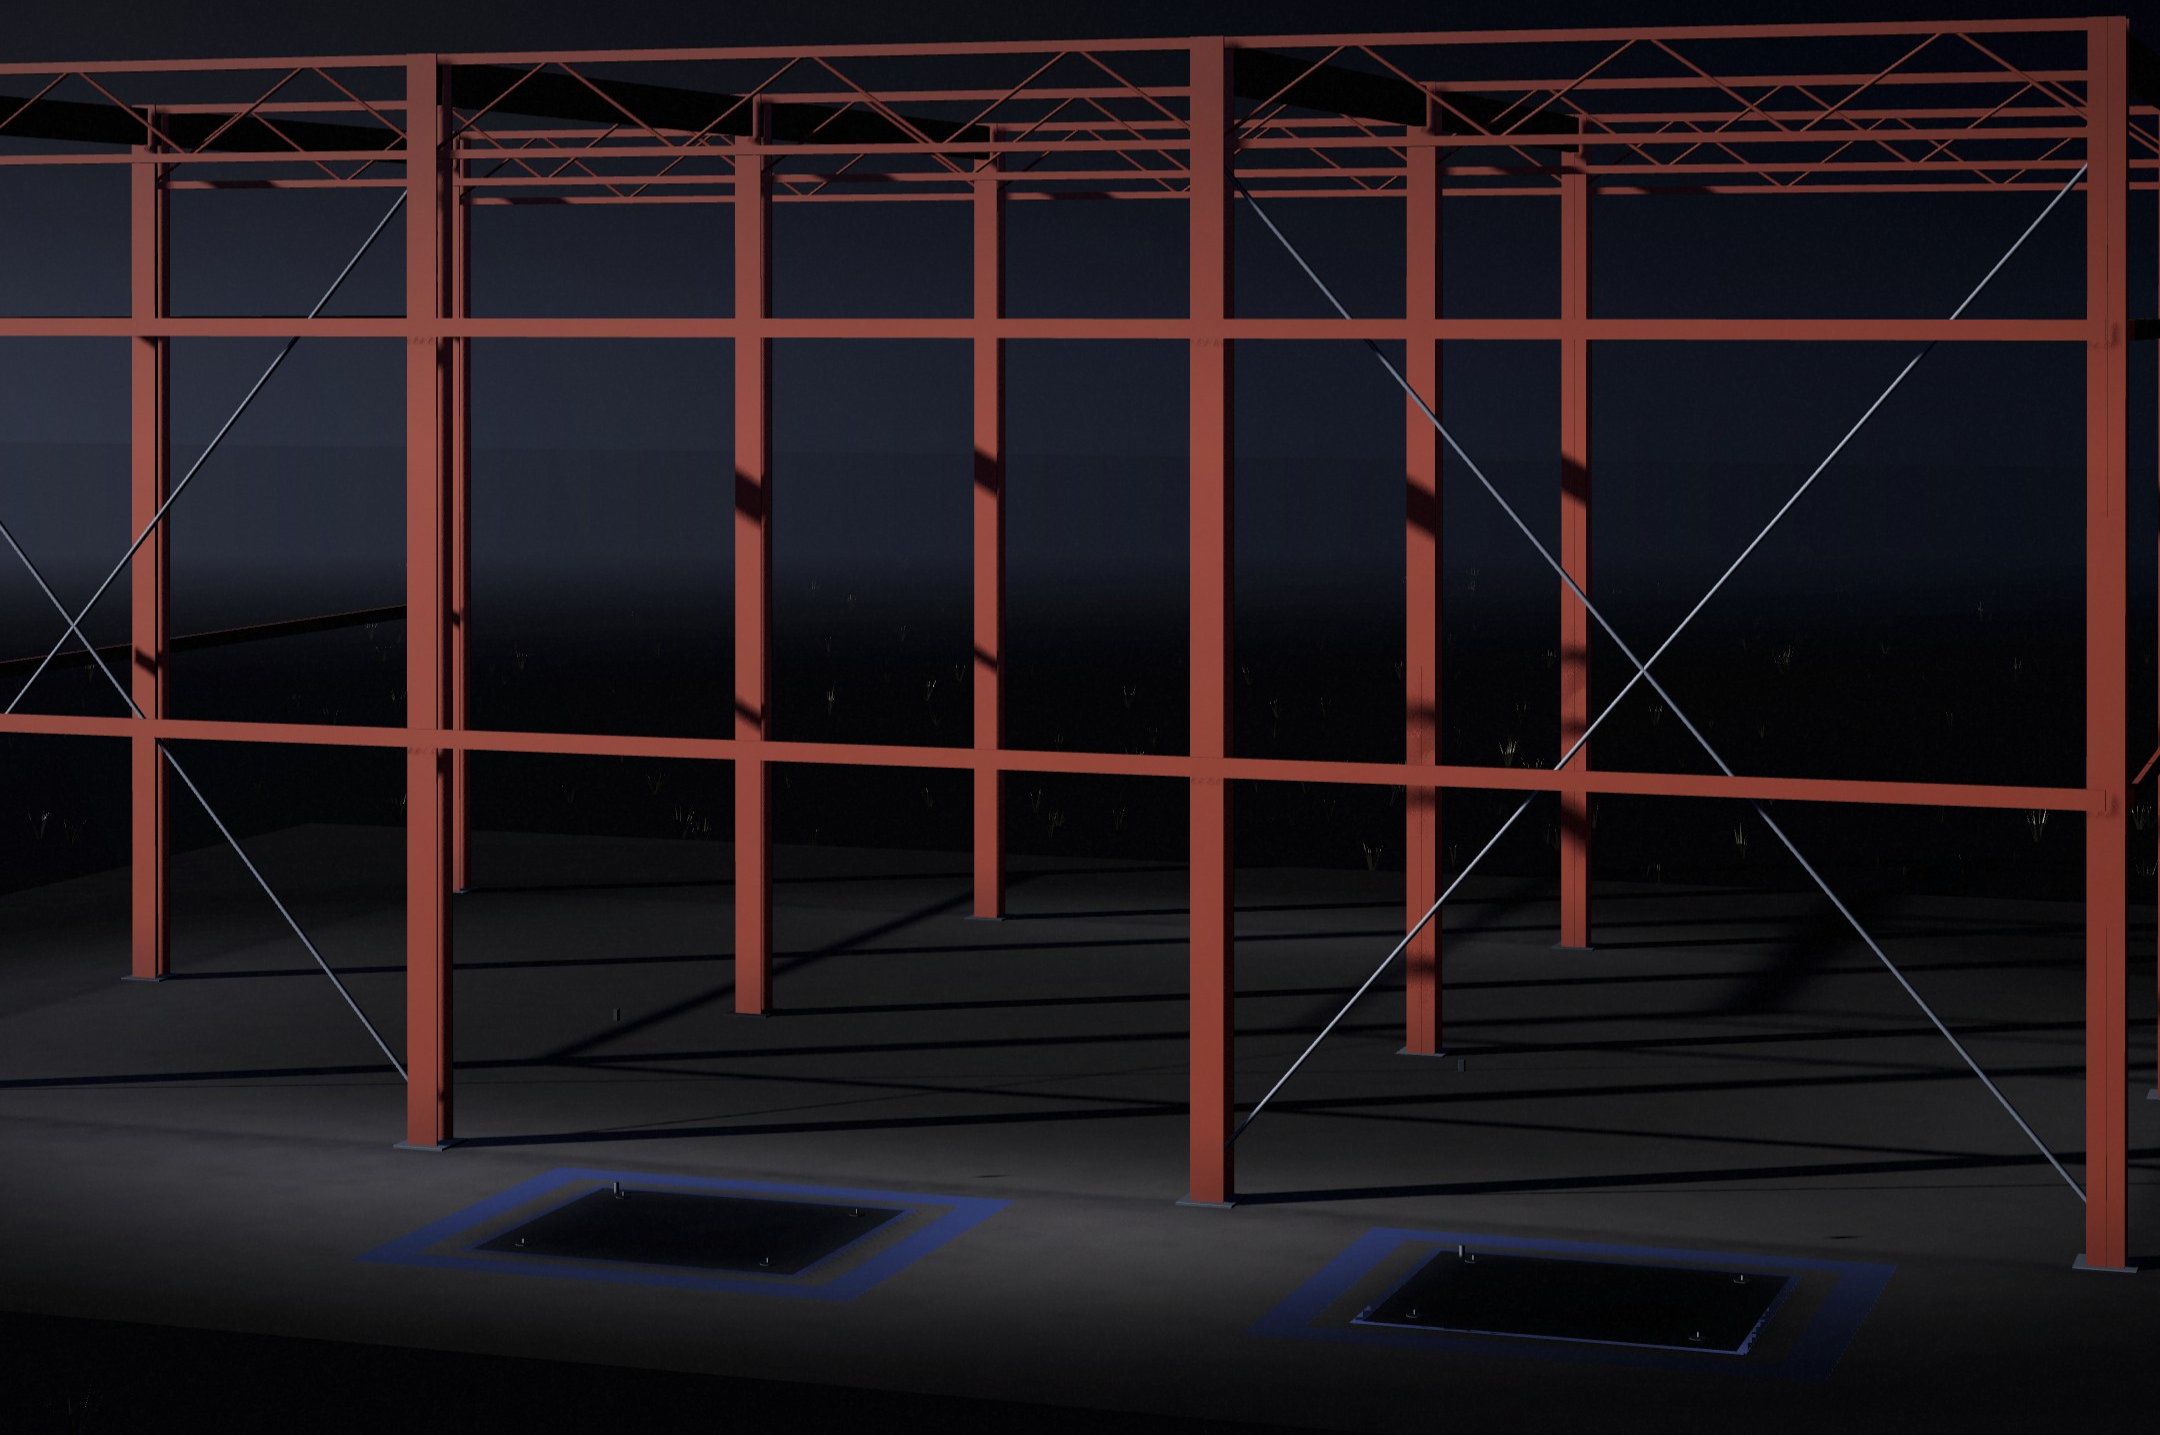

Training compute, in megawatts

The rows under Tesla’s Texas label list Cortex 1 at more than 105 MW and Cortex 2 at more than 120. Tesla plans 400 MW by year end for vehicle and humanoid robot autonomy software and names no place.

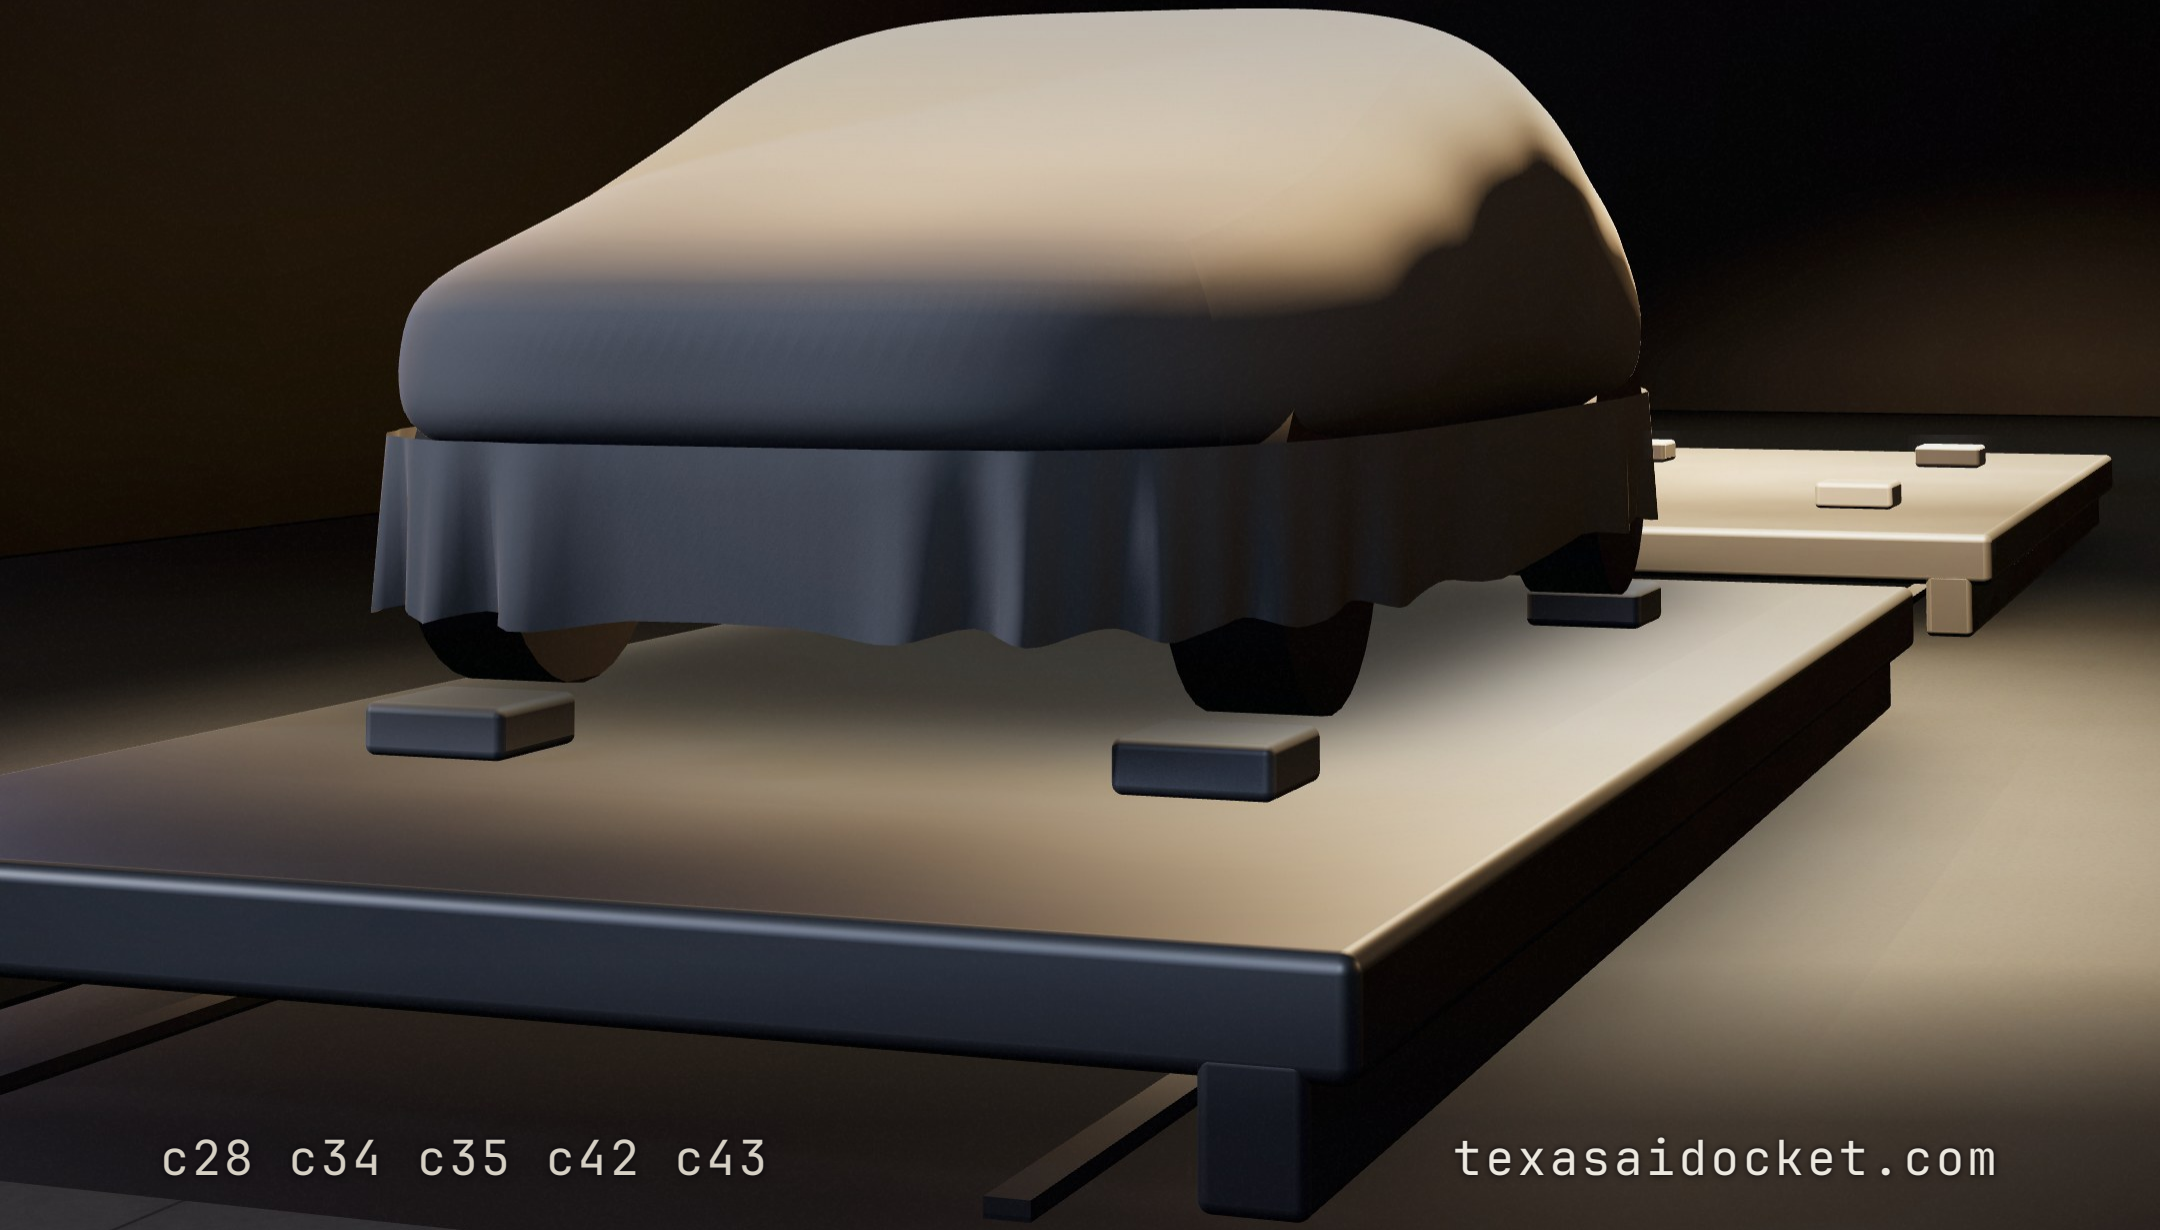

The Austin Fab is still under construction

Tesla says it kept building the Austin Fab this quarter and plans to start commissioning equipment there in 2027. The steel is drawn to illustrate.

Cybercab deployment began in Austin. Tesla gives no count.

The cars go into its Austin Robotaxi fleet. The update gives no count of cars built. Federal regulators are auditing how Tesla certified a car that lacks permanently attached pedals and steering wheel. The car is drawn to illustrate.

A lit bay is a status, not a count

Tesla says installed capacity is not the current production rate, which turns on uptime, supply, downtime for upgrades, regulation and other factors. Its update gives no count of Cybercabs built.
