

Texas put AI in a money class.

The board's own course text tells a student to research career pathways using *artificial intelligence tools*.

Ten chapters. The machine is in three.

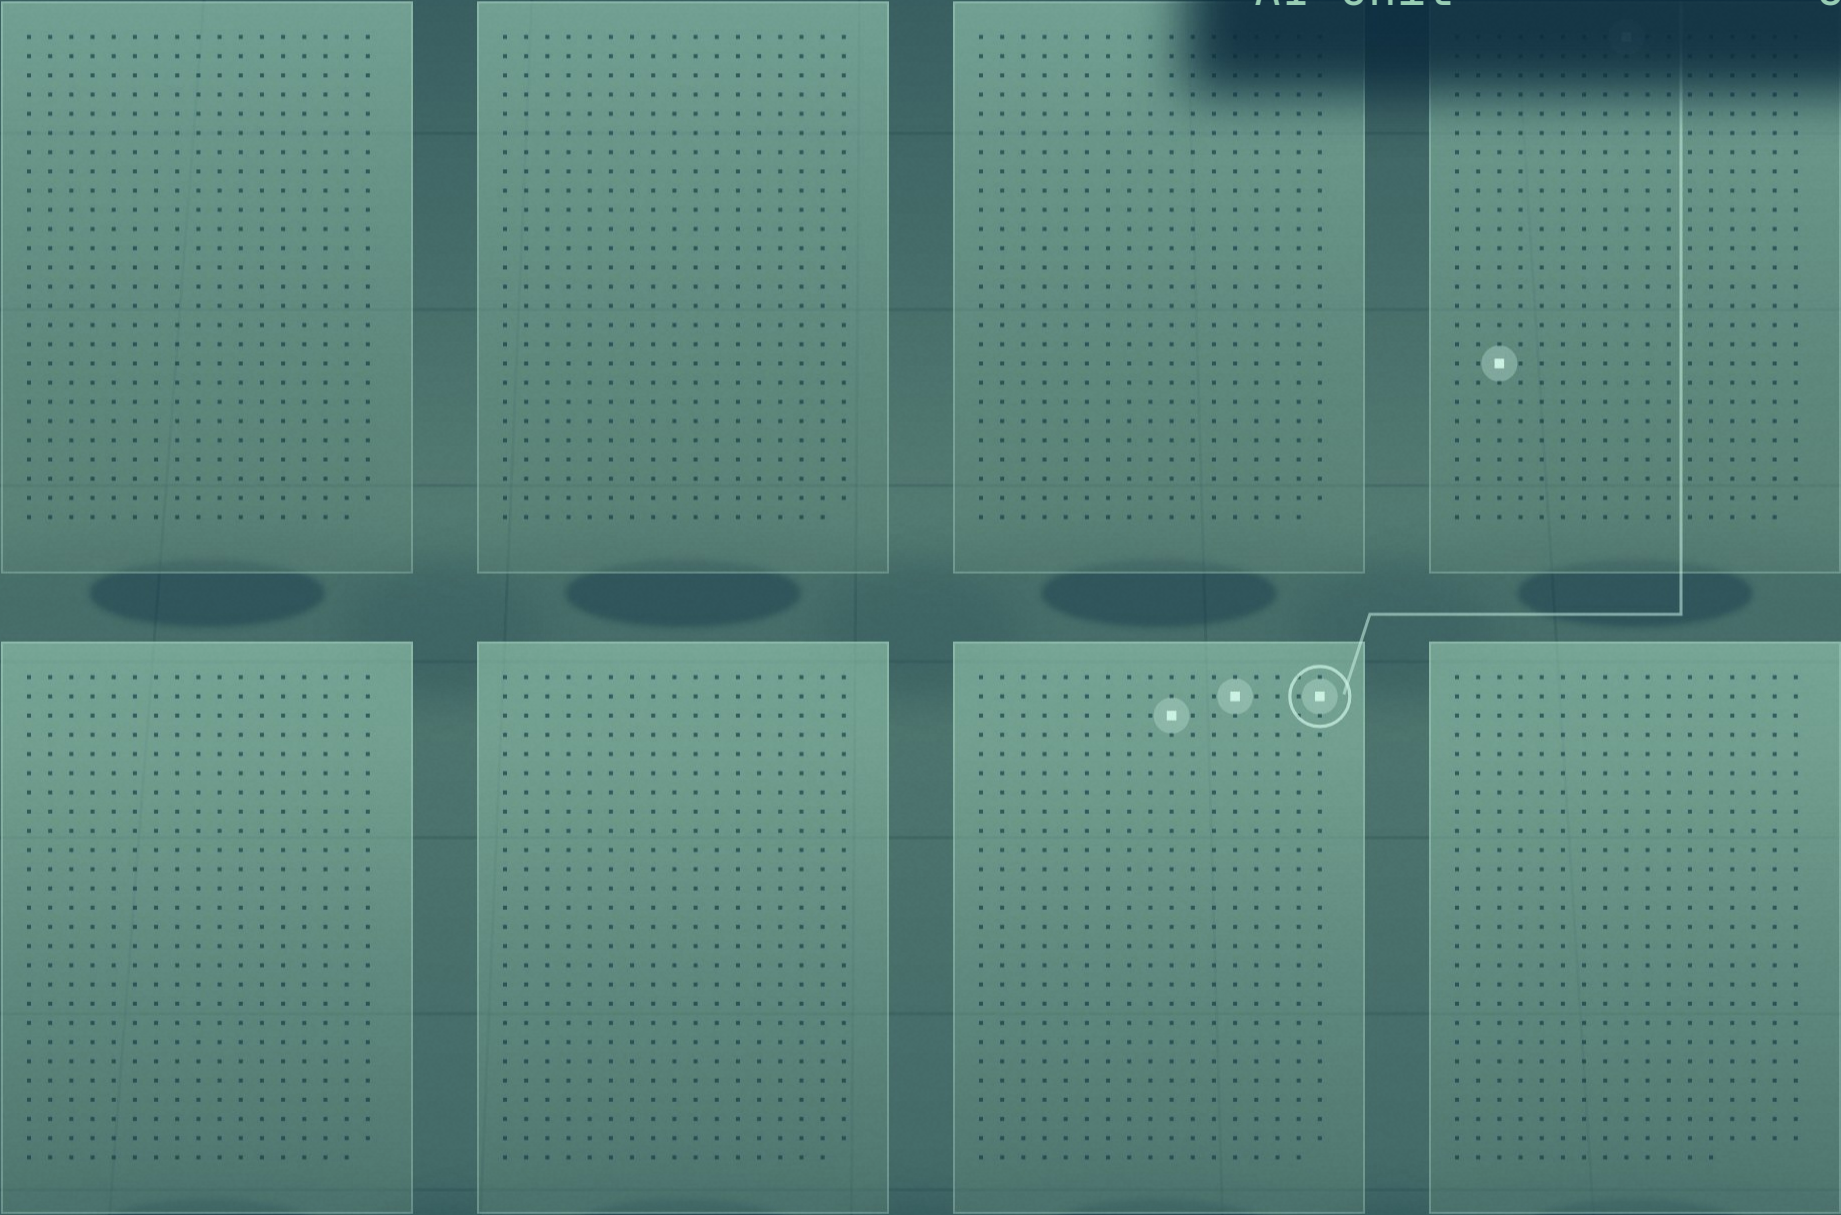

Every chapter of the course text is a thing a student must be able to do with money. Seven of them never mention a machine.

One dot for every word.

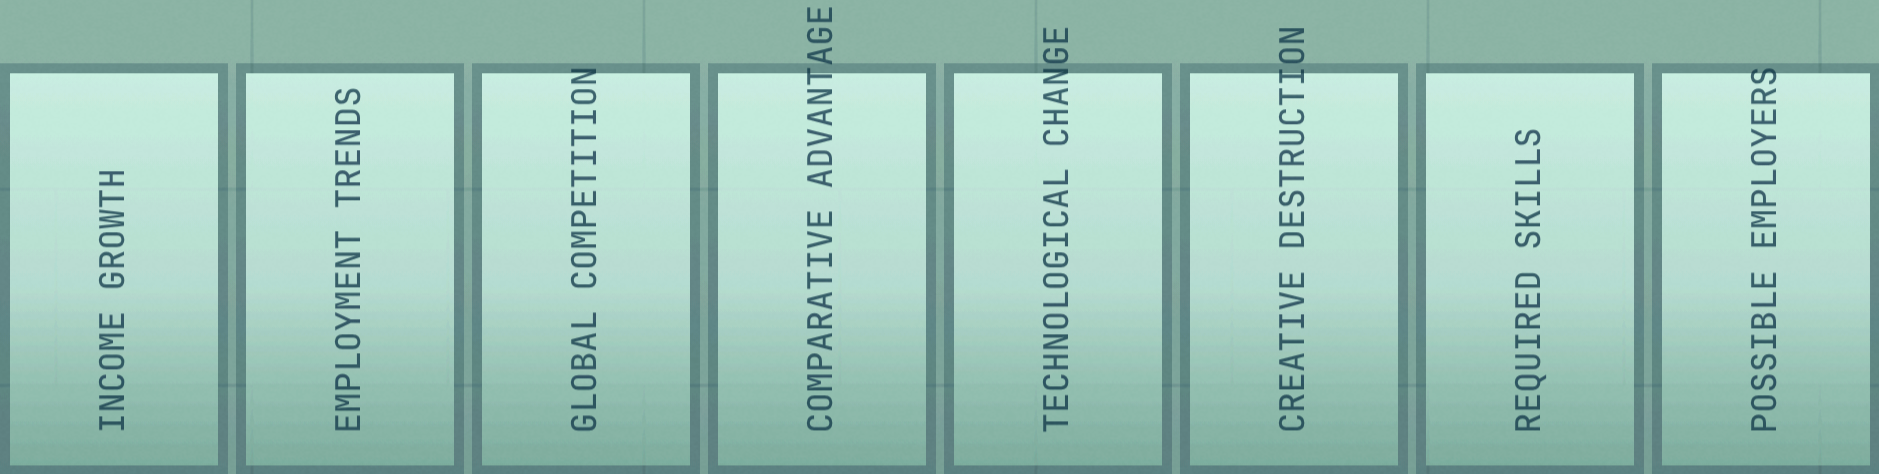

Four terms carry the machine across the entire course text. Three of the five sit inside one clause.

artificial	1
intelligence	
algorithm	2
automated	1
robot	1
AI unit	0

Chapter three

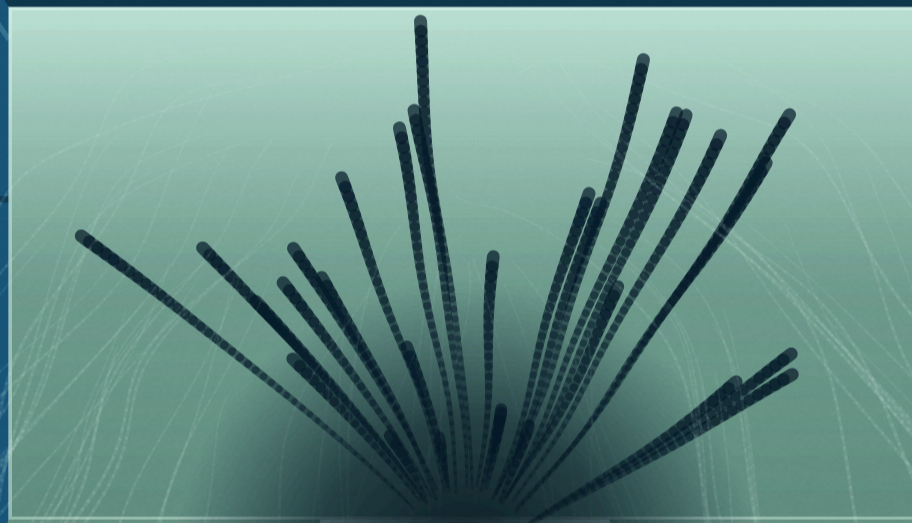

hands it over.

THE VERB IS RESEARCH

*"research career pathways using labor-market data, online resources, and **artificial intelligence tools**"*

Chapter four turns it around.

"in a digital age"

THE VERB IS EXPLAIN

*"explain how consumerism and marketing strategies, including social media influencers, **algorithm-driven recommendations**, financial technology platforms, and traditional advertising, influence spending behavior"*

Chapter seven says find where it stops working.

APPRAISE

*"appraise responsible use of financial technology through automated investment platforms, including robot-advisors and micro-investing apps, by analyzing **fee structures, investment strategies, algorithmic limitations, and suitability for different investor profiles**"*

SECOND READING AND FINAL ADOPTION

Its own summary ends in and more.

0 artificial 0 algorithm 0 automated
0 machine learning 0 technolog 0 AI

"The new TEKS will teach students how to set goals, budget, save, invest, develop business plans and more."

EXPLAIN

APPRAISE

Districts teach it from the school year that opens in 2027.

IMPLEMENTED 2027 to 2028 school year

EFFECTIVE 20 days after filing with the Texas Register

CREDIT one-half credit

SECOND READING AND FINAL ADOPTION

September 4th, 2026

The rule is made. The text is unread.

The board acted on an attachment headed "Text of Proposed New 19 TAC". The Register filing is unchecked against it.

Ask your district who is staffing the three machine expectations.
