

An Austin college is writing AI policy

Austin Community College says it is developing what it calls its "first-ever" AI policy. A framework called TRUST is meant to help shape it. The post is dated October 9th. The desk and the walk are drawn to illustrate.

Five rules, one for each letter of TRUST

The college says two collegewide AI committees developed the framework. Each rule is one sentence in its post. Matching each rule to a part of the desk is an illustration.

TELL WHERE

REVIEW OUTPUTS

TREAT IP
WITH RESPECT

79 desks, one for every thousand students

The college says more than 79,000 students rely on it for their education each year. Each desk here stands for a thousand of them.

ONE DESK = 1,000 STUDENTS A YEAR

Its AI hub already links a use policy

The college's AI Resource Hub links a PDF titled Acceptable Use of Artificial Intelligence Policy, marked for ACC faculty and staff only. The post calls the coming policy the college's "first-ever." The page is drawn to illustrate.

The judgment stays with the person

"AI can support your work, but it should never replace your expertise, decision-making, or responsibility," the third rule reads. The first asks people to say when AI plays a meaningful role.

Three dates on fourteen pavers

One paver for each day from the October 9th post to the October 22nd seminar at Highland, both ends counted. The town hall is October 12th at Rio Grande. A faculty convocation titled The Two Als is October 16th at Eastview.

OCTOBER 22ND
SEMINAR

OCTOBER 16TH
CONVOCATION

OCTOBER 12TH
TOWN HALL

The walk ends where the post does

The post names no adoption date, no vote and no adopting body. Its last date is the October 22nd seminar. It is a guided discussion of E. M. Forster's story The Machine Stops.

October 12th, 6:30 p.m., the town hall

The college says its Faculty and Student AI Town Hall will explore in-progress AI policies. It runs until 9 p.m. at the Rio Grande Campus. The room is drawn to illustrate.

Community members are invited too

The college invites faculty, staff, students and community members to take part in one or more of the events. Feedback and questions go through a form on its page about getting involved with generative AI.
