A chatbot for Plano, and Darwin AI beside it

The city's October 12th agenda carried $190,000 for ChatGPT Enterprise and $150,000 for Darwin AI, a platform its maker says tracks AI use. Each weight is $10,000, a drawing unit. Drawn to illustrate.

One item, on the consent agenda

Item (f) sat on the consent agenda, which the council acts on in one motion. It held four lines inside a ceiling of $390,000. Drawn to illustrate.

(f)

c4 c6

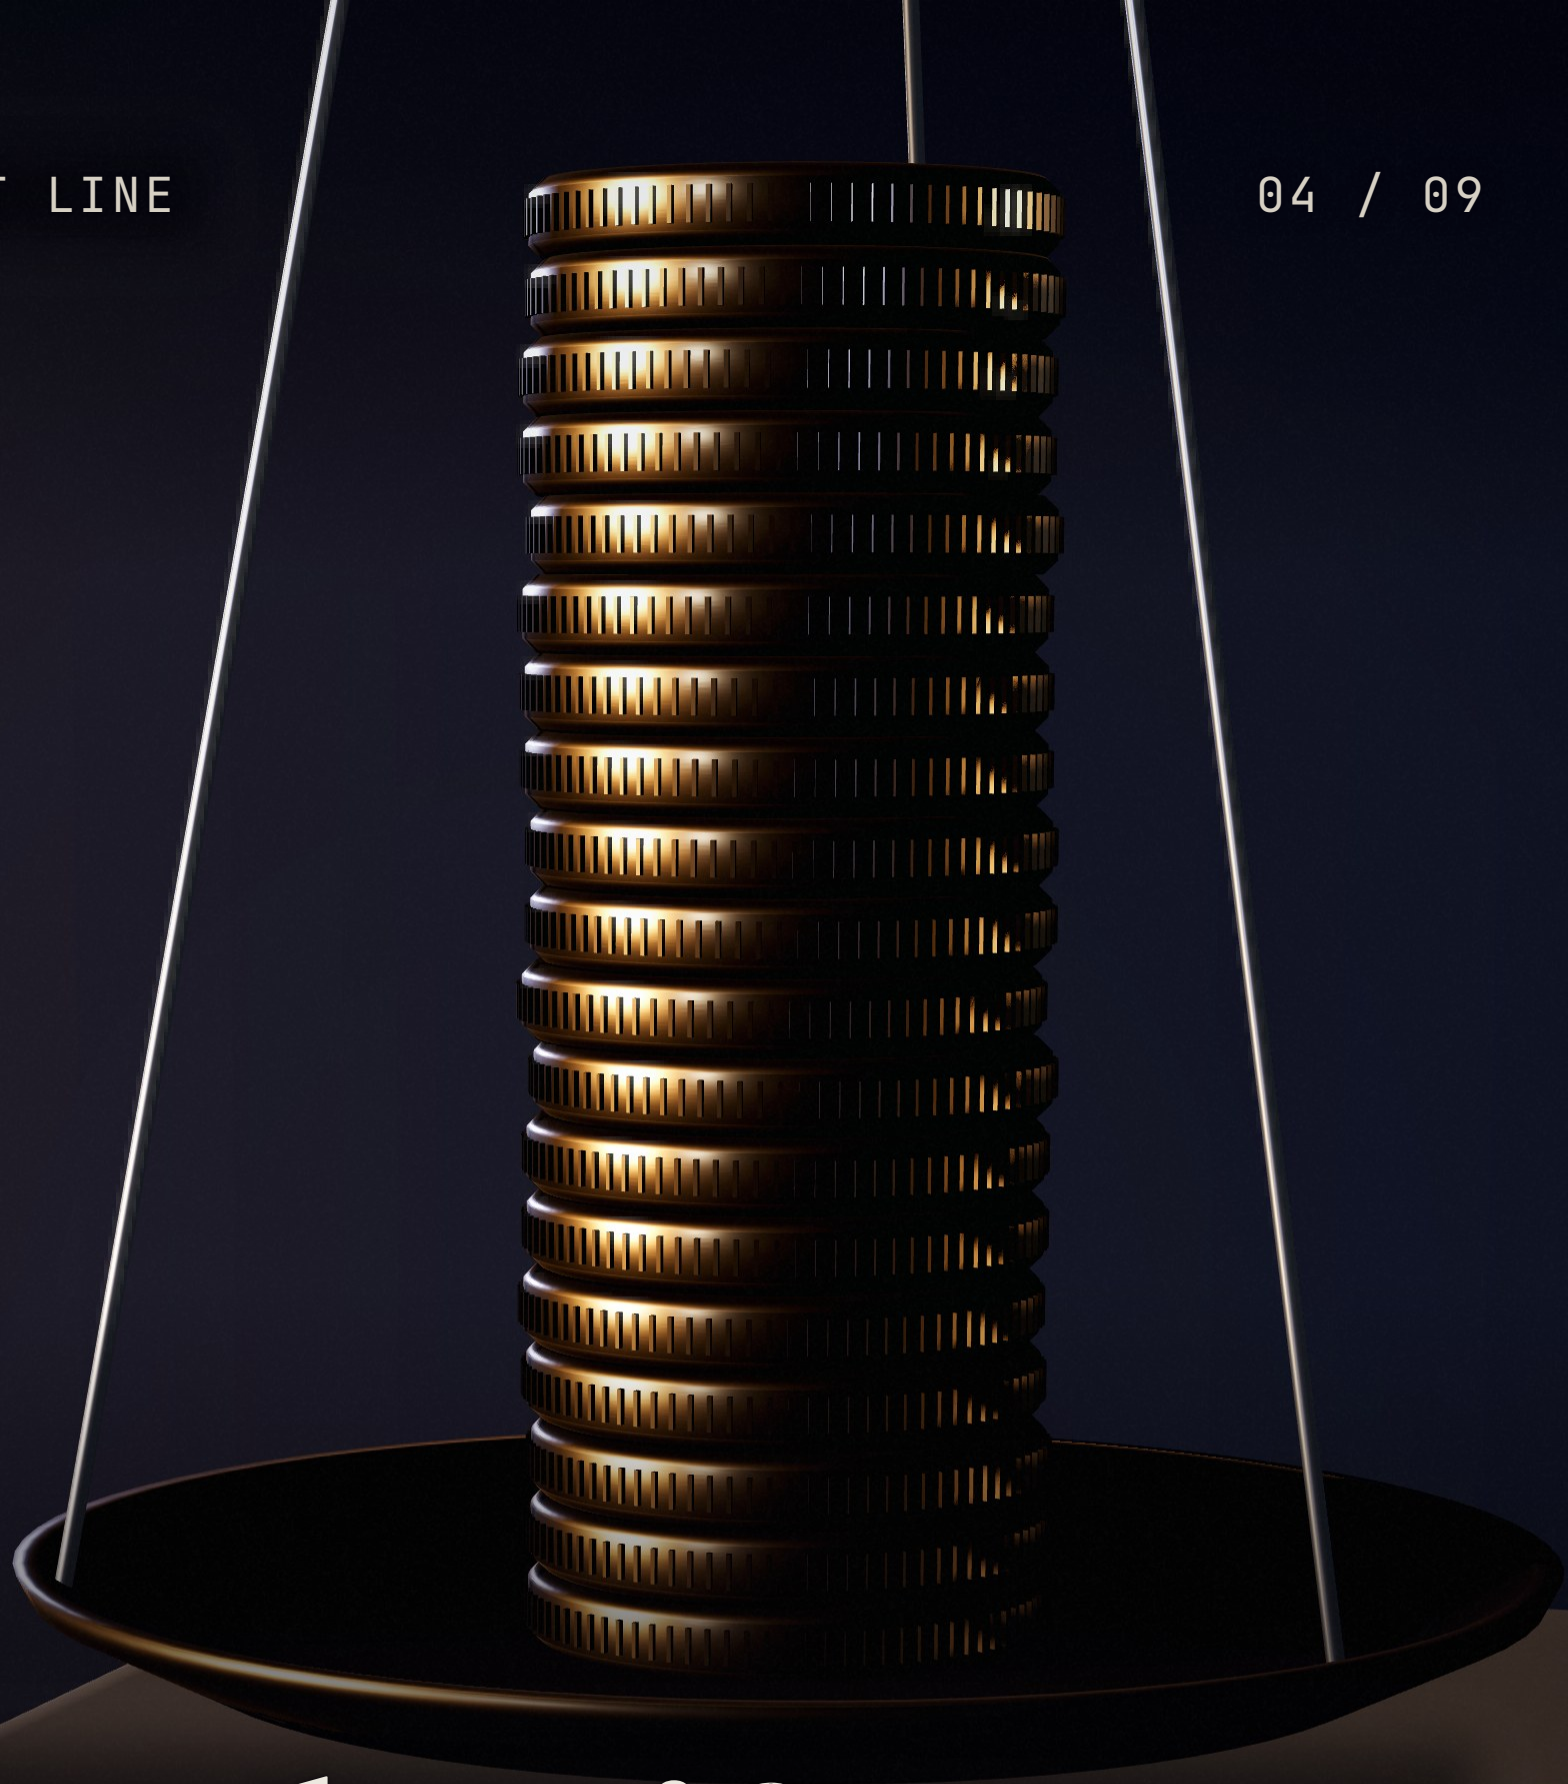

The whole ceiling, in weights

39 wells of $10,000 each. 19 hold ChatGPT Enterprise, 15 Darwin AI and 1 Microsoft. The 4 empty wells are the reserve the item holds for growth and other costs. Drawn to illustrate.

- CHATGPT ENTERPRISE
- DARWIN AI
- MICROSOFT
- RESERVE, EMPTY

c1 c2 c3 c4

Of the ceiling, 49 percent covers the chatbot

ChatGPT Enterprise from Carahsoft is $190,000 of the $390,000 ceiling. 19 weights of $10,000. Drawn to illustrate.

79 cents for Darwin AI per chatbot dollar

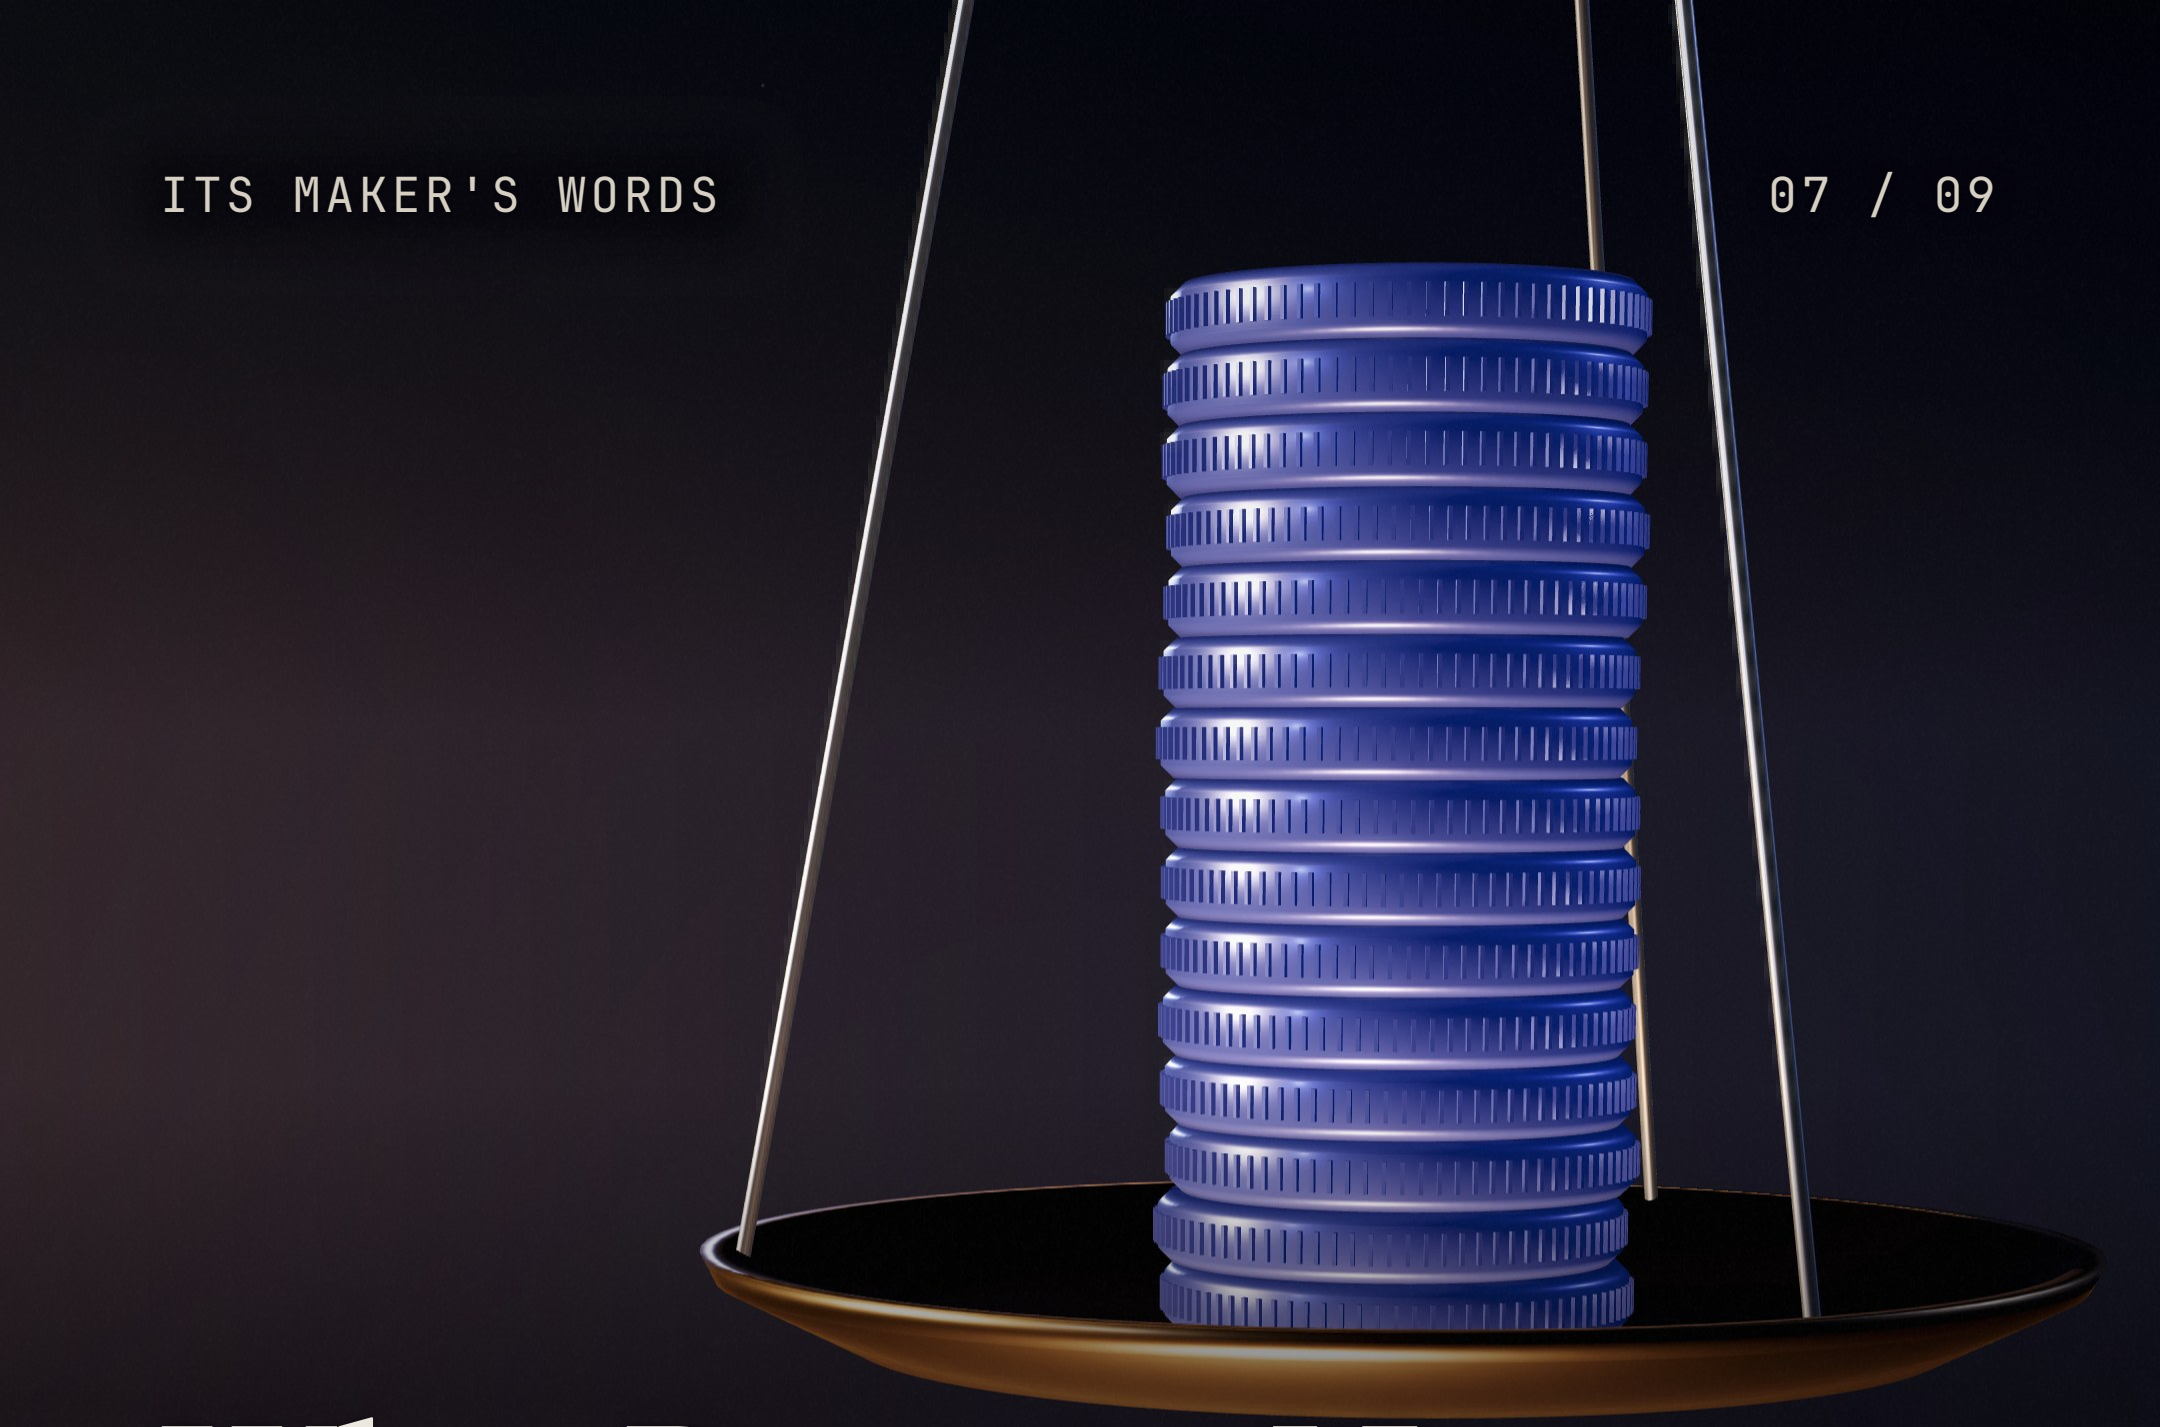

For each dollar of ChatGPT Enterprise, the item sets aside 79 cents for Darwin AI. Drawn to illustrate.

The difference equals the reserve

ChatGPT Enterprise outweighs Darwin AI by $40,000. The reserve the item holds for more licenses and other costs is also $40,000. The tilt is a drawing.

What Darwin AI says it does

The item's reseller links to this maker. Drawn to illustrate.

"Track AI usage across users, tools, and departments"

"Continuously monitor AI activity, investigate violations, and maintain a complete audit trail."

Approved, in records still marked draft

The October 12th minutes note the item approved. The October 26th minutes, also a draft, mark those minutes approved. Drawn to illustrate.

A ceiling of about 133 cents a resident

The $390,000 ceiling spread over Plano's 293,286 residents in the Census estimate. Plano's Legistar lists the council's next meeting for November 9th.
Drawn to illustrate.
