

The rooms are named. Consent is not.

The university's own account names the rooms. Houses, dorms, cafes, a public museum and a rehabilitation hospital.

"An internal ethics board will oversee the research and develop consent and opt-out procedures."

Same deployment. Three grains.

homes, hospitals, workplaces,
and public spaces

NSF release, c33, 4 settings

residential, commercial, and
healthcare facilities

NSF abstract, c15, 3 types

houses, dorms, cafés, a public museum, a **rehabilitation hospital**, and elder-care and assisted-living residences

UT Austin, c21, 6 places

The most specific list is the awardee's own.

Always on. Increasing in complexity.

The agency's own abstract calls the sites "always-on, participatory living laboratories", and says the deployments "will increase in complexity over the Center's duration".

It is not a grant.

The instrument on the record is a cooperative agreement and not a grant. The record's own field says so.

The size as each document gives it.

NSF award record,

29999998

UT Austin account c20
five-year, \$30 million award

NSF release, per center c31
approximately \$6 million annually

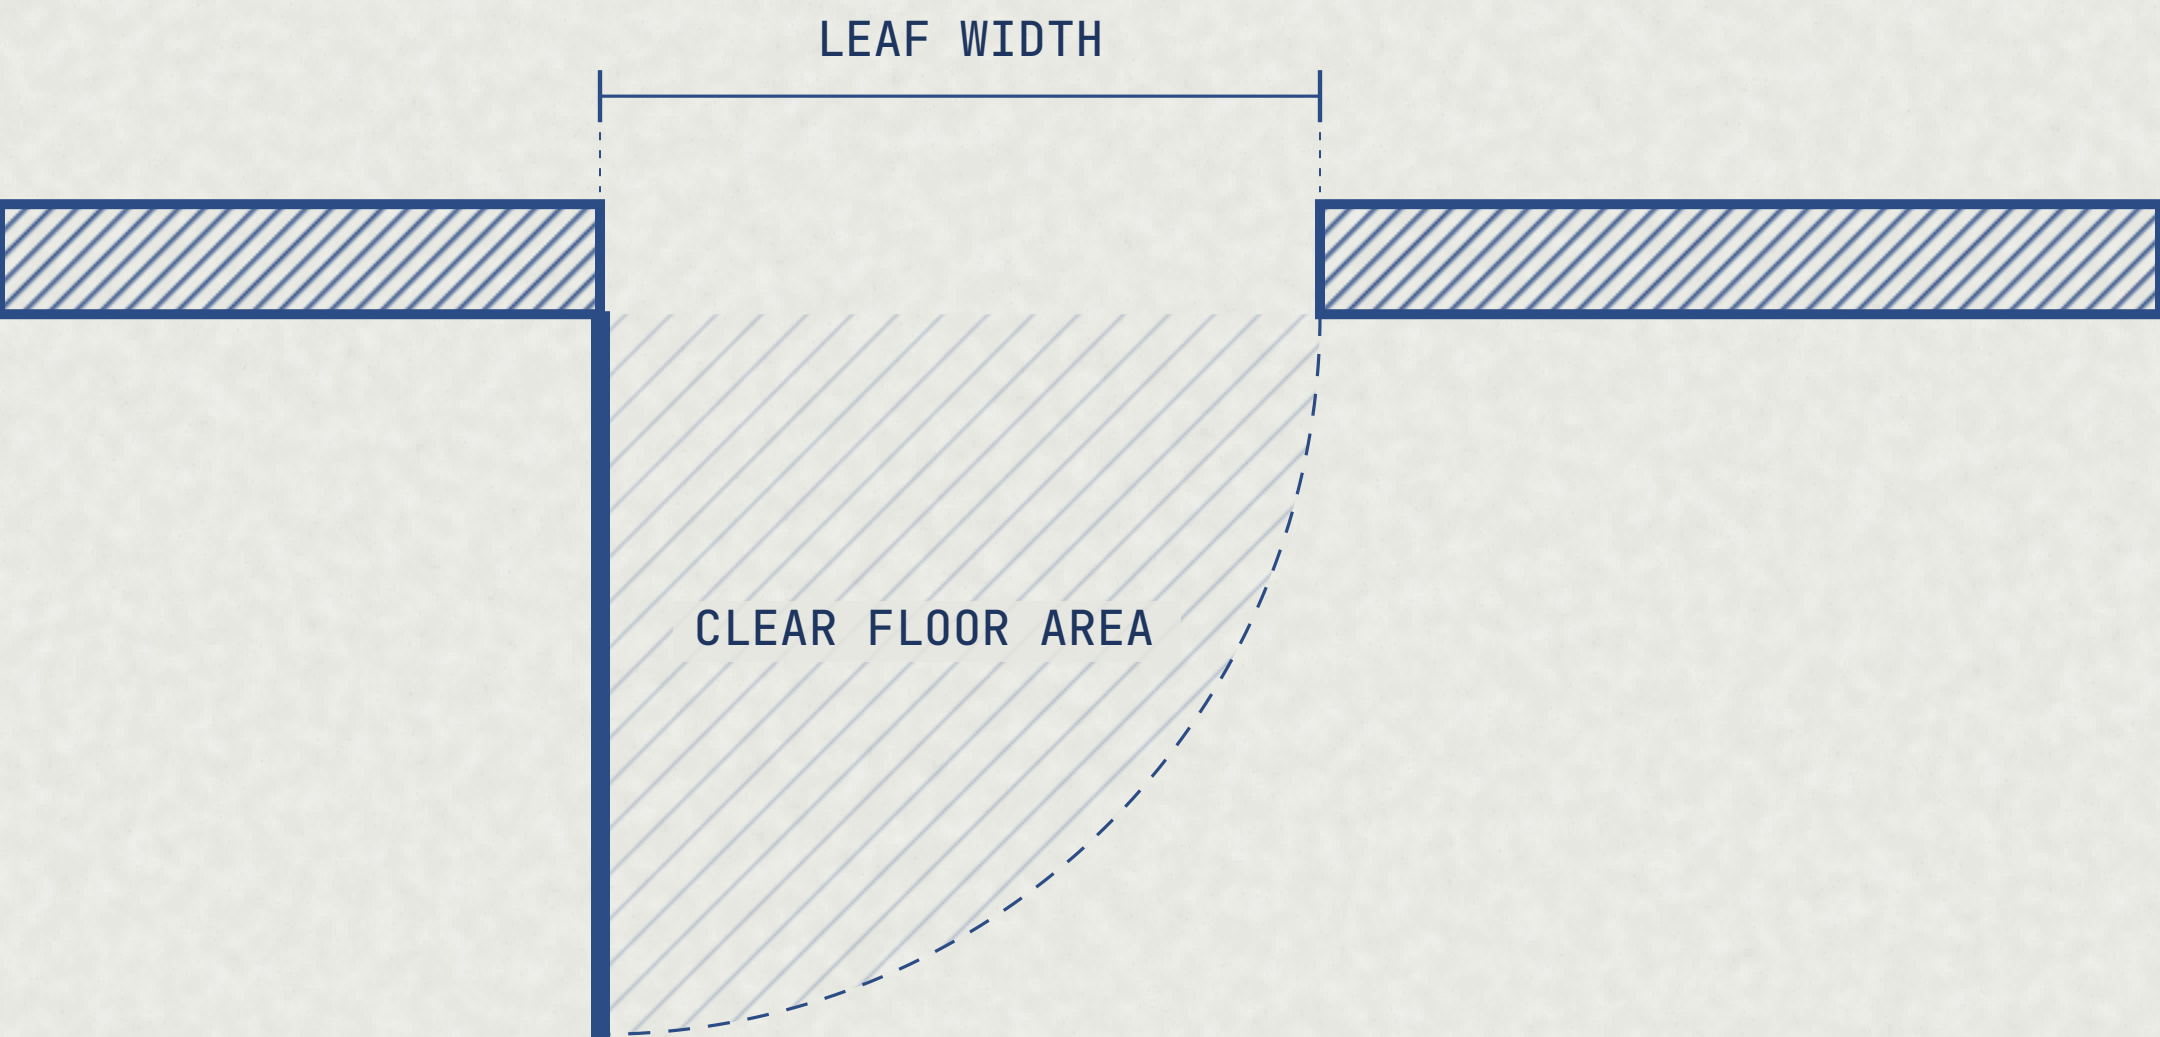

Each figure is quoted from the document named beside it. Nothing here converts one into another.

Every step of the way.

"Every step of the way, community members will have an opportunity to influence how, when and where robots get deployed"

UT AUSTIN, c23 • THE CENTER GREW FROM A CORE PROJECT OF GOOD SYSTEMS, c26

The swing is drawn. The procedure is not.

"An internal ethics board will oversee the research and develop consent and opt-out procedures."

THE PROCEDURE IS NOT DRAWN HERE BECAUSE THE RECORD DOES NOT CONTAIN IT

People adapt too.

"while recognizing that people also adapt their behavior when they integrate robots into their environment"

UT AUSTIN, c24

One door, and a date on it.

September 1st, 2026.

THE WORK STARTS c6

The work starts that day. The consent and opt-out procedures are still to be developed.
