

Sought by

Two words decide who a permit halt reaches.

Denied connection

The audit names one consequence and calls it denial of connection to the Texas grid. A machine standing on a pad is not asking for one.

One page, two scopes

One sentence names who is asking. One names an audit a project may never enter.

PERMITS SOUGHT c1

"all permits sought by data centers"

ALIGN PERMITTING DECISIONS c11

**"align its permitting decisions with the
Governor's directives and use the information
from those audits"**

Ninety percent of the new ones

THE WHOLE QUEUE, ON NO SCALE HERE

474 GW

DATA CENTER SHARE OF NEW POWER REQUESTS 90%

PERMITS SOUGHT BY DATA CENTERS

NO COUNT IN THE DIRECTIVE

The queue holds about 474 gigawatts of requests to connect. The state puts data centers at about ninety percent of the new ones.

Forty, behind the meter

76 MW

One West Texas data center has contracted 76 megawatts from about 40 reciprocating gas engines. None of them asks the grid for anything.

This is one of them

A single set on its skid, and somebody who works on it.

Forty nine days, then twenty eight

AUGUST 3RD AUDIT ORDERED

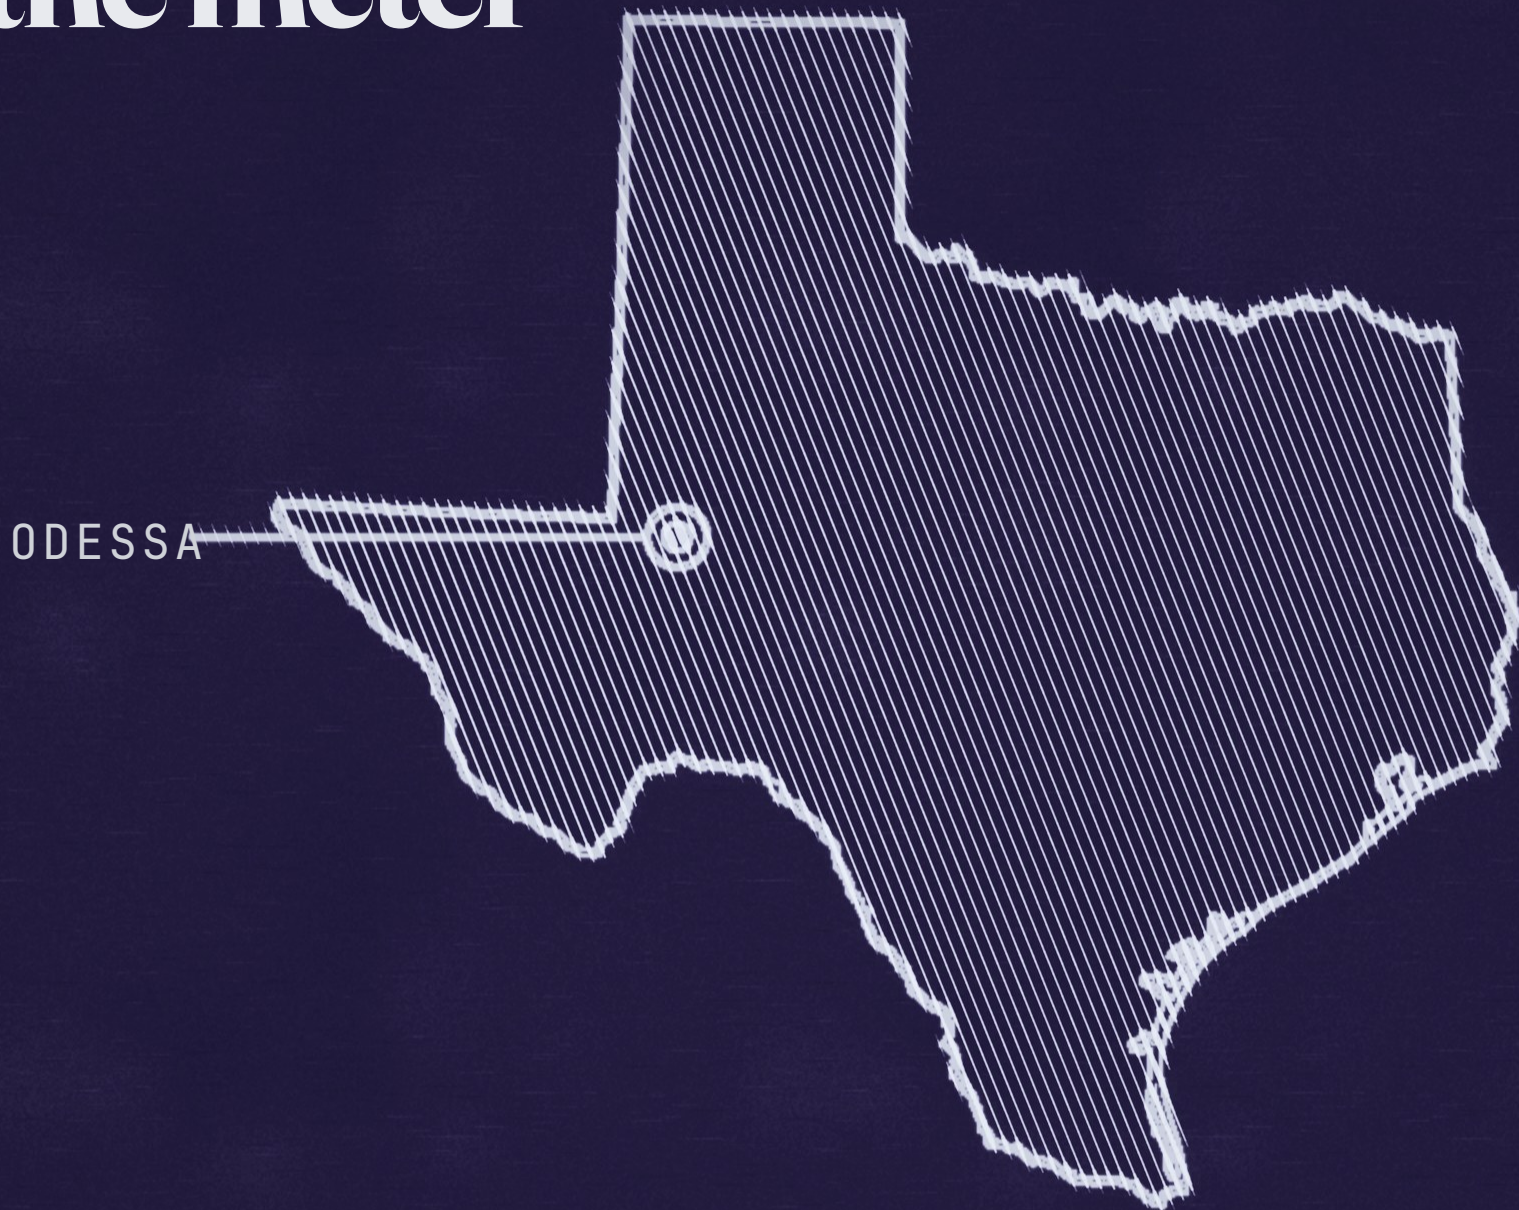

SEPTEMBER 21ST PERMITS DIRECTED

BY OCTOBER 19TH AGENCY ANSWERS

The audit was ordered August 3rd. The directive came 49 days later.
The agency answers to the Governor's office 28 days after that.

Next door says nothing about the meter

1,180 MW THE PLANT

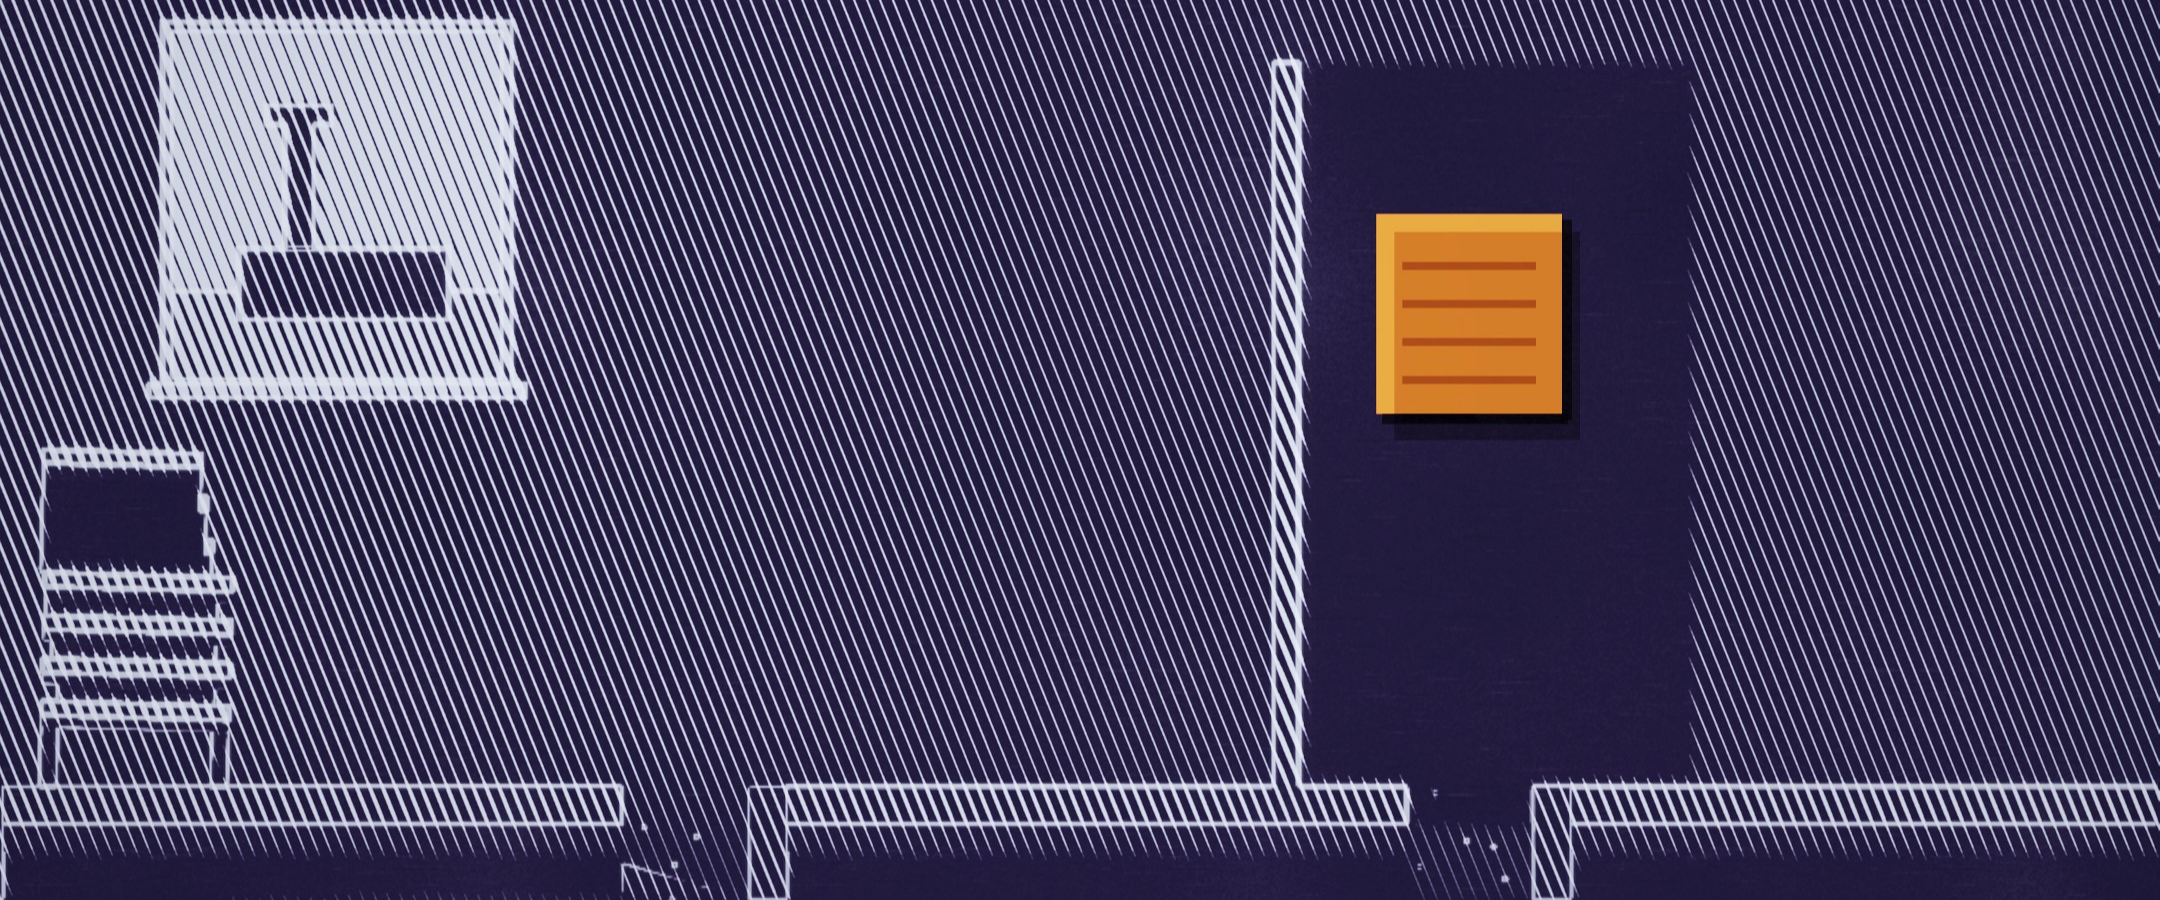

207 MW CONTRACTED, PHASE ONE

An Odessa project contracts up to 207 megawatts from a 1,180 megawatt plant immediately adjacent to it. Adjacent is a statement about distance. The record does not say where the meter sits.

The room was already empty.

The state canceled the notice and comment hearing on Bexar County data center permit O4791, captioned to Vantage Data Centers TX11. It says the hearing will be rescheduled for a later date and gives no date.

NO DATE YET FOR THE HEARING. TCEQ ANSWERS TO THE GOVERNOR'S OFFICE BY OCTOBER 19TH.
