

Taylor's terms, in feet

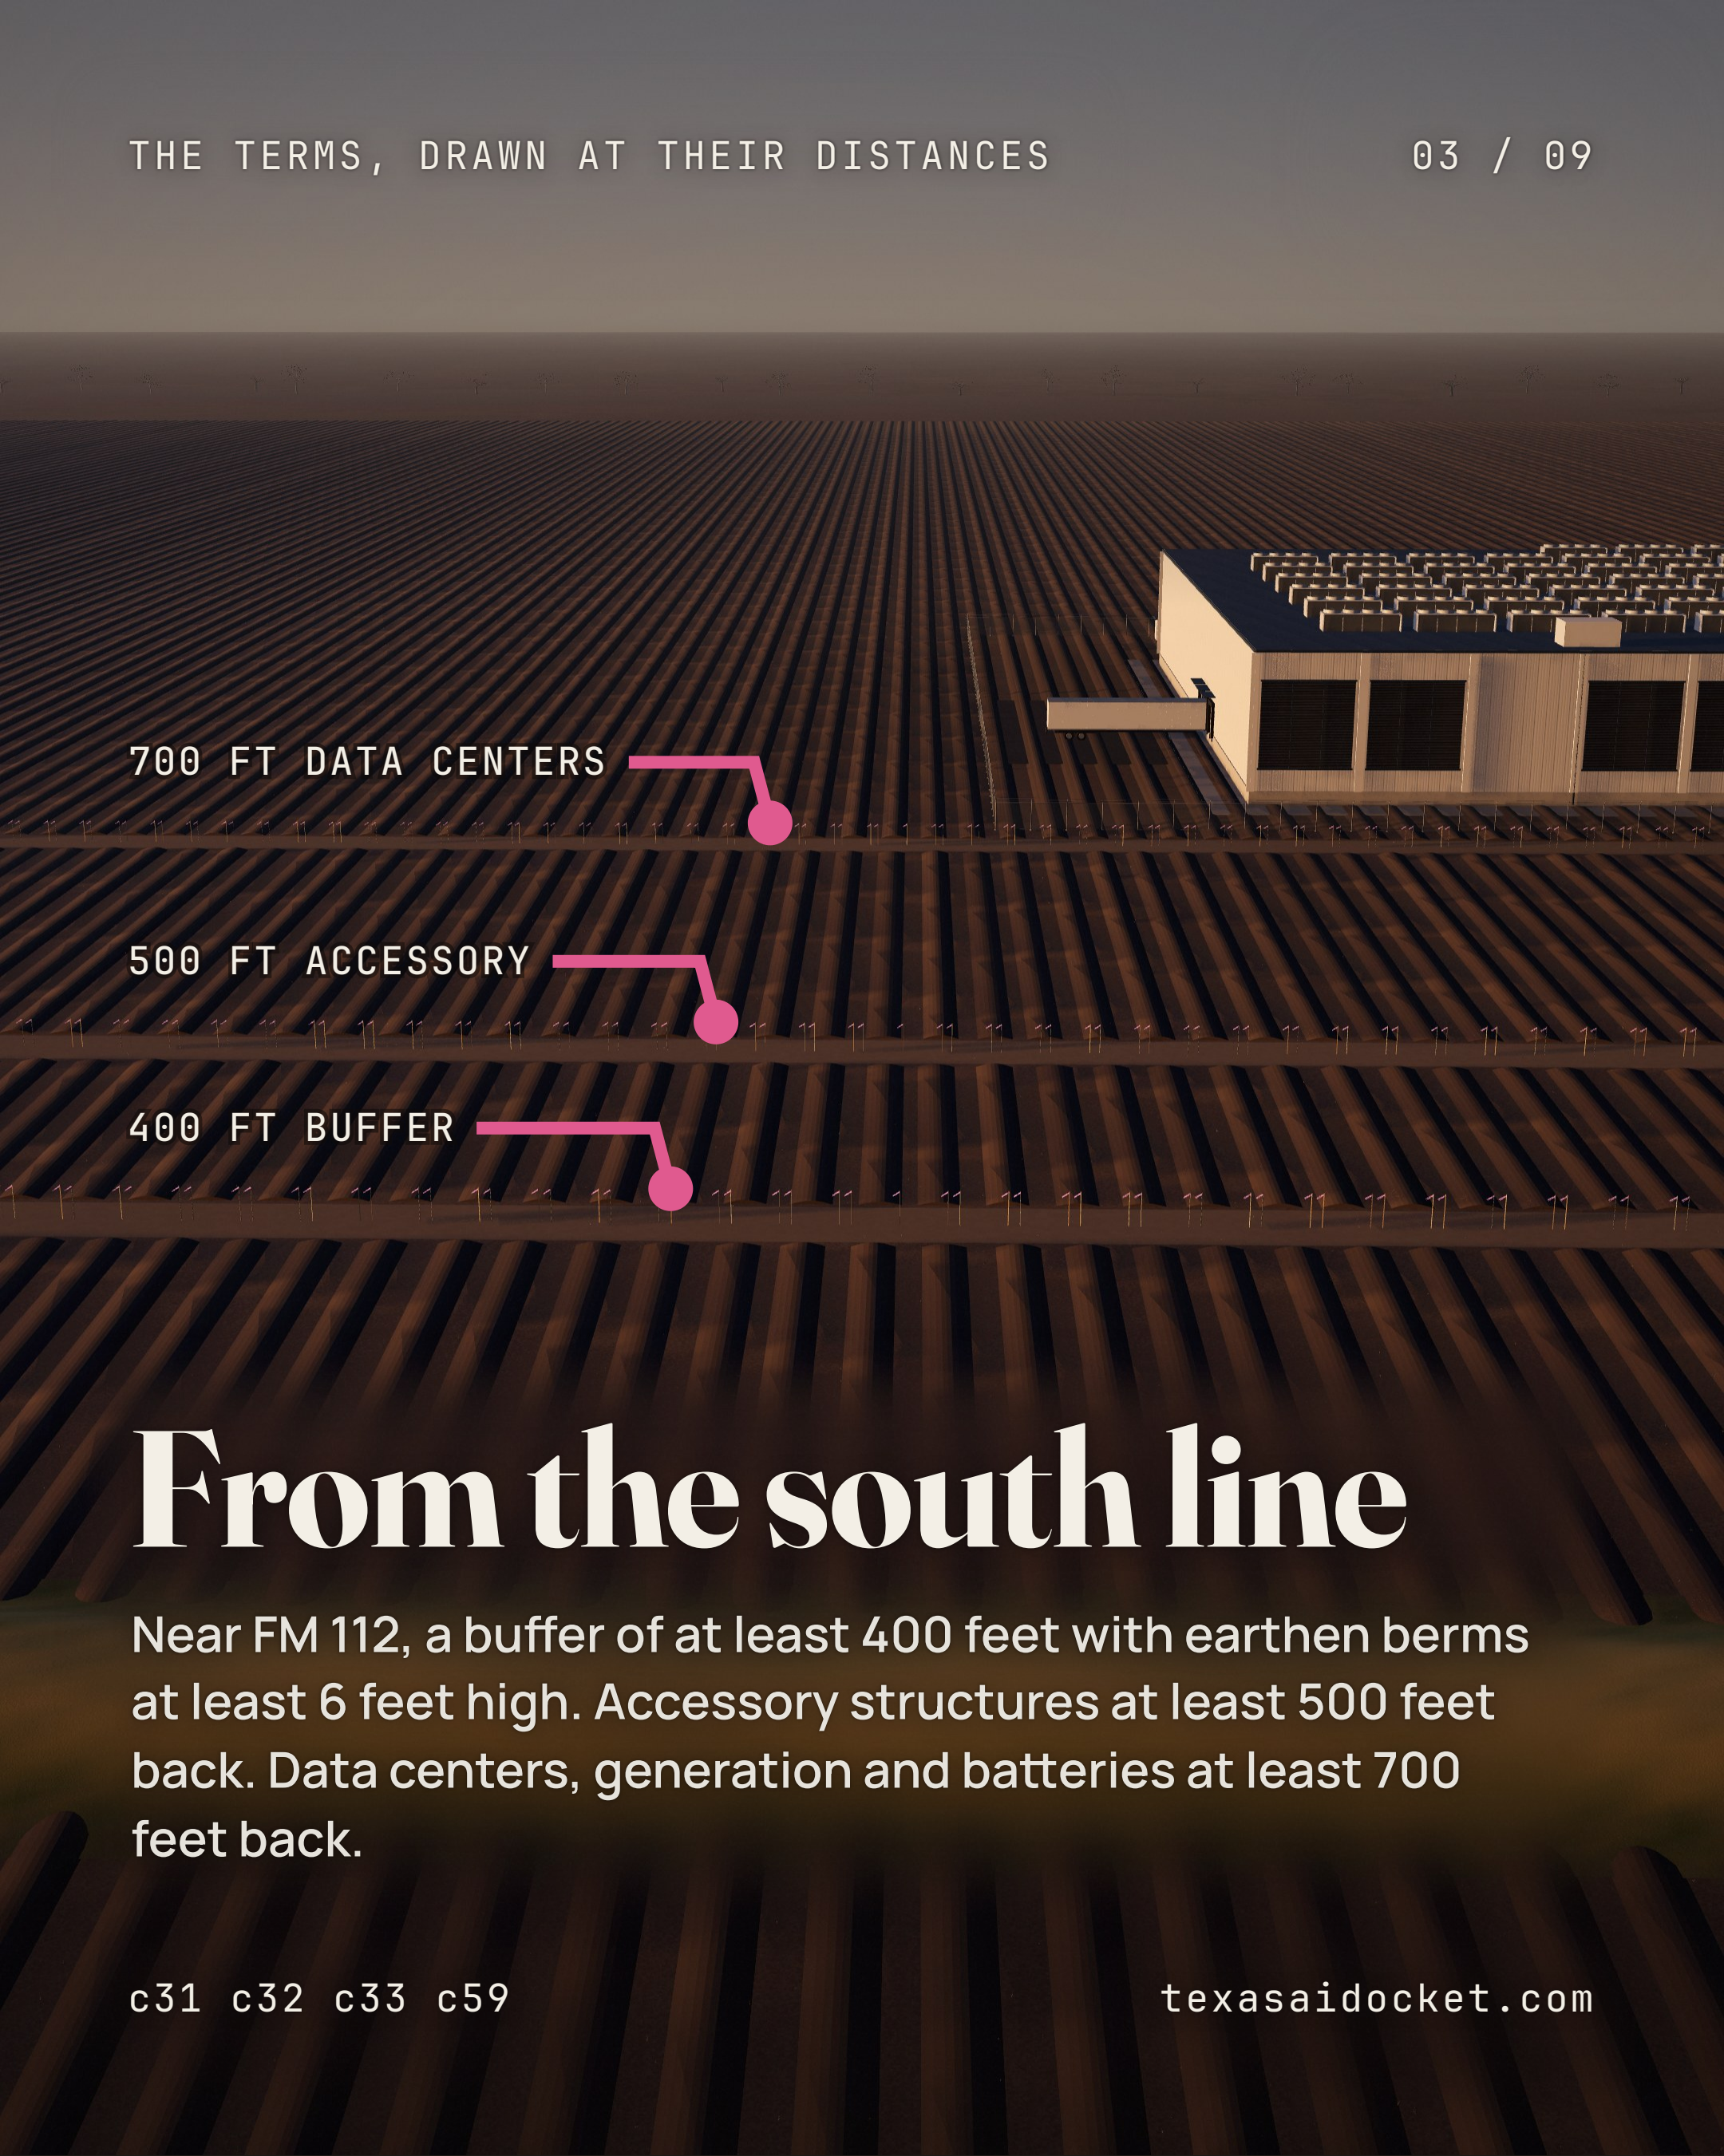

The City Council votes October 8th on a proposed agreement for a 664-acre data center campus with its own power generation. The stakes in this field mark the south line and the distances its terms set.

Without it, no zoning at all

The developers withdrew their annexation and zoning application on September 3rd. The city says that without the agreement the land stays in unincorporated Williamson County, which has no zoning authority.

700 FT DATA CENTERS

500 FT ACCESSORY

400 FT BUFFER

From the south line

Near FM 112, a buffer of at least 400 feet with earthen berms at least 6 feet high. Accessory structures at least 500 feet back. Data centers, generation and batteries at least 700 feet back.

WITH THE TERMS 65 DBA OR THE BASELINE

WITHOUT 85 DBA

65 decibels, or the level before

The terms cap the campus's noise at 65 dBA or the level before construction, whichever is greater. A study at the property lines would set that level. Without the agreement, the city lists the state's 85 dBA.

The closest a data hall gets to the south line

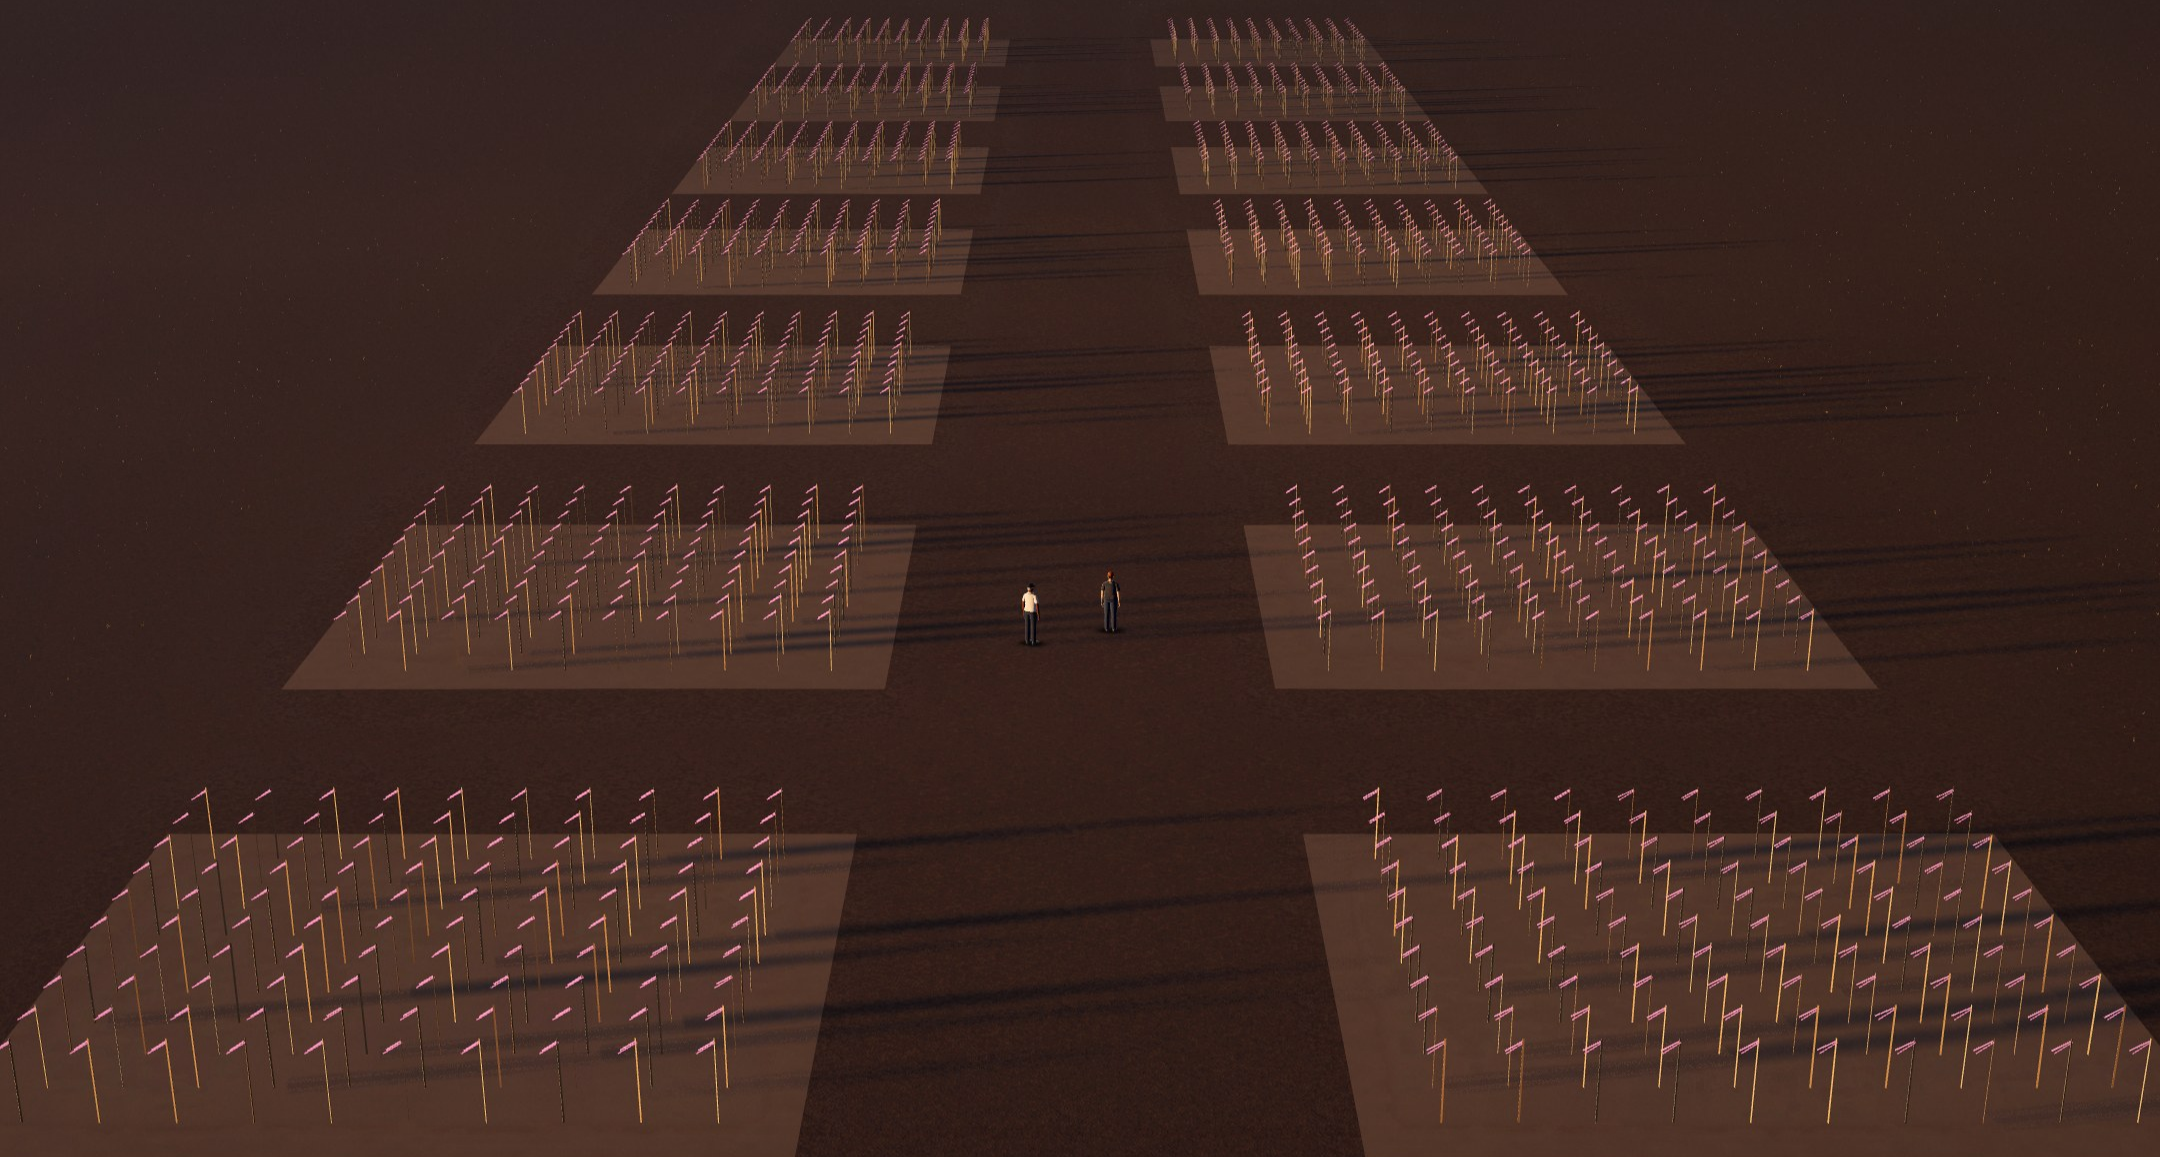

Data centers, power generation and battery storage would stand at least 700 feet from the south line. The hall here is drawn for scale, and the size of the real buildings is not in the record.

6 feet of earth

A buffer of at least 400 feet along the south line would carry landscaping and earthen berms at least 6 feet high. The city says the buffer areas would separate the development from nearby homes.

1.575 million gallons to start

Cooling would run in a closed loop on reclaimed water with an initial fill of 1.575 million gallons, drawn here as one basin 6 feet deep. Drinking water would stay out of cooling except in three circumstances.

About 1,400 signed a ban petition

In June residents petitioned for a temporary ban on new data centers. KEYE reports the city found it can't go on the ballot. Texas Standard reports coalition members filed a motion with the Third Court of Appeals.

The vote is October 8th

Big Watt Digital and PowerHouse Data Centers would commit \$28.2 million and ask for no tax abatement. Regular council meetings are held in the City Hall Council Chambers.
